# Kissinger Going Tonight to Help Talks in Mideast

By Marilyo Berger

WASHINGTON. Jan. 9 (WP).—Secretary of State Henry A. ssinger will leave for Egypt tomorrow night to present Israel's inciples on the disengagement of forces to President Anwar Sadat. Following discussions in Aswan. Mr. Kissinger will go on to nel in an attempt to bring the negotiating positions of both untries closer together to permit an early separation of forces untries closer together to permit the Suez Canal.

The White House made the announcement of Mr. Kissinger's trip today in San Clemente. The secretary will be accompanied by Archaes down Elisworth Bunker,

## **lideast Talks** lecessed for Consultations

.S., Russia Schedule trategy Meetings.

By Henry Tanner GENEVA. Jan. 9 (NYT).—Is-eli and Egyptian generals susinded their deadlocked military

lks here today for six days to low time for their governments make new political decisions. The bargaining over the first ep toward a negotiated settle-ent of the Middle East conflict us moves back to Cairo, Jerulem, Washington and Moscow. The negotiators, Maj Gen. ordechai Gur for Israel and aj. Gen. Taha Magdoub for

sypt, are expected to return to fir capitals for consultation. The recess of the deadlocked iks that began just after pristness will give the United ates and the Soviet Union an oportunity to nudge the parties oser to agreement. Secretary of tate Henry A. Kissinger is going the Middle East tomorrow ight while Soviet leaders will be usuiting in Moscow during the cekend with Egyptian Foreign linister Ismail Fahmy.

Informed diplomats said today that the Israeli delegation had not yet but on the conference table the plan for the disengagetnent of Israeli and Egyptian forces on the Sues front that Defense Minister Moshe Dayan discussed with Mr. Kissinger in Washington last week,

Egypt Apprised The plan in its outline, how-ever, is known to the Egyptians, be sources said. The U.S. ambatador in Cairo, Herman F. Filts. vas present at some of the Kisinger-Dayan meetings and since eturning to the Egyptian capital, as been holding consultations

Ambassador Ellsworth Bimker, who has been named the U.S. representative at the Geneva posce conference on the Middle East; Assistant Secretary of State Joseph J. Sisco and his deputy. Alfred L. Atherton: Harold Saunders of his National Security Council staff, and Carlyle E. Mew the State Department's legal adviser, apparently to look over the fine print of an egree-

At the State Department, spokesman George Vest said that the trip is expected to take less than a week. It was understood that Mr. Kissinger will take from Egypt the reaction to the Israeli principles. Then, in Israel, the cabinet would have to approve a negotiating proposal that may even require parliamentary con-sideration. It has been learned that if these actions are taken quickly enough, Mr. Kissinger could then return to Egypt for another round.

The effect of Mr. Kissinger's trip-his third to the Middle East since the Arab-Israeli fighting erupted again last October— is to remove the actual negotia-tions on a disengagement plan from Geneva to Egypt and Israel, with the secretary acting as the go-between. This would appear to put the direct negotiations, which the Israelis have insisted upon since the 1967 war, by the boards Work in Corridors

Mr. Vest said that "most conferences take place in an atmosphere where certain work is done at the table and certain work is done in the corridors.

conference table is in Geneva and the corridors seem to be spread all over God's green acre throughout the Middle East. So the coridor work is done out there and this is the perfectly natural way in which to prepare for the more precise final arrangements, which we hope will come out at the

Israeli Foreign Minister Ahba Eban has accepted the Kissinger role as a fact of life. He said in an interview with the New York Post: "A peace conference is an areas in which agreements reached outside its walls are ratified." Mr. Vest said that Mr. Kissinger would leave at midnight tomorrow. He said that Mr. Kissinger would have with him ideas which serve as "a preinde to a concrete proposal." He said: We've had the Israeli ideas. These are ideas that both sides will want to ponder and which can crystallize into a proposal that could be usefully advanced

at Geneva." Israel is understood to be prepared to pull back its forces from positions on the west bank of the Suez Canal and some distance from the east bank to the Gidi and Mitia passes. #### No Change for at Least 3 Months

# OPEC Decides Not to Cut Oil Price

By Clyde H. Farnsworth

GENEVA, Jan. 9 (NYT).-Mafor oil-exporting nations, after quadrupling their prices in the last three months, today promised stability over the next quarter, but warned that future price decisions binged on the industrial countries ability to control both inflation and the profits of oil

Ministers from member states of the Organization of Petroleum Exporting Countries, often re-ferred to as a cartel met here the first three days of this week at an often stormy extraordinary

It was called to work out a price strategy, consider entering a dialogue with consumer countries and discuss what the ex-porters should be doing with their swollen wealth for the poor countries of the world.

Main attention and most of he arguing centered on pricing policies. Prices are now frozen at least until April 1.

Proposal Rejected

The conference rejected a proposal to mark crude oil prices downward in line with the recent sharp increases in the value of the dollar, the currency in which most oil contracts are written. As the dollar was falling six months ago, the oil exporters raised their prices to compensate for the additional dollars they needed to buy goods from Westneeded to buy goods from West-ern Europe and Japan. But in drawing up future price strategy this week, they decided that a ris-ing dollar value was only one of several factors that had to be weighed. They assigned the OPEC Economic Committee to

study the matter and come for-ward with recommendations on the level of posted prices that would be applicable on April 1. The conference responded cautionsly to American initiatives for a dialogue between consumer and producer countries to discuss common problems.

Exchange of Opinions'

The communique of the conference said only that the "ex-change of opinions and information with the consuming countries about matters of common interest would be useful. This wording reflects the opposition of the more radical states, such as Libya, to collective consultations. OPEC's Economic Committee

is to make contacts with organizations of consumer countries such as the Executive Commission of the European Common Market and the Secretariat of the Organization for Economic Cooperation and Development,

President Nixon today invited foreign ministers of six West European countries, Canada and Japan to attend a meeting in Washington on Feb. 11 to discuss a common program to deal with oil shortages. He sent personal messages to heads of state of the oil-producing countries, informing them of this meeting: and suggesting a later international conference of both produc-

rorists is to begin in two weeks ers and consumers. The OPEC today leaves the • Israeli security forces stagdoor open for such a meeting, though enthusiasm is distinctly

# **EEC Accepts U.S. Proposal** For Joint Action in Oil Crisis

By David Haworth

BRUSSELS, Jan. 9 (IHT) .-The Common Market Executive Commission today responded favorably to U.S. proposals for cooperation in the world energy

The response was to Secretary of State Henry A. Kissinger's recent proposal urging that a high-level action group composed of representatives from all indus-

trialized nations be set up to re-view the energy shortage. Today President Nixon formally invited foreign ministers of six West European countries, Canada and Japan to attend an energy meeting in Washington Feb. 11. The European countries are Britain, France, West Germany, Italy, the Netherlands and Nor-

The White House said that Mr. Nixon also had sent personal messages to heads of state of the oil-producing countries informing them of the meeting and suggesting a later international conference of both producer and consumer nations.

In Bonn, a West German spokesman said today that Chan-

cellor Willy Brandt's government will accept Mr. Nixon's invitation to attend the foreign ministers' energy crisis meeting in Washing-

their oil. So far, however, this

# **Negotiations Deadlocked**

# 'No Progress' in Sight In British Coal Crisis

LONDON, Jan. 9 (Reuters).— Negotiations to end Britain's crippling coal dispute ended in deadlock again today amid warnings from industrial leaders of an imminent worsening in the na-

The leader of the miners, Joe Gormley, emerged from a two-hour meeting with the govern-ment concilietor, William White-law, and reported that neither negotiator hed much hope for further bareaining under the covernment's anti-inflation guide-

The word was "no progress" from both sides. And Lord Carrington, the government's new energy chief, said in e radio tilterview that no government minister could envisage a settlement

outside these guidelines.

This left the government and unions stalemated on the 58th day of a ban on overtime by Britain's 270,000 miners. This, on top of the world energy squeeze, has brought Britain its worst industrial and economic erisis since World War II.

Opposed Positions The "standstill" report on the

miners' front came as Prime Min-ister Edward Heath and the opposition Labor party leader, Harold Wilson, restated inposed positions in an emergency debate in the House of Commons. Legis-lators cut short their Christmas recess to attend.

Mr. Heath said it was still not too late for reason to prevail in a crisis that has forced most of British industry on to a three-day week, forced layoffs and caused scrious shortages of steel. But Mr. Wilson accused the government of handling the crists —and especially the miners' dis-pute—with a cynical calculation of its own political interest. He said Britain had never in this generation been so bitter and

Labor members roared with approval when Mr. Wilson said that the miners were the "solid rock of social democracy." The coal ord second to that of no other section of the community.

The noisy debate came after Queen Elizabeth II returned to Buckingham Palace from a winter break at Sandringham in east-ern England for a meeting of senior advisers which extended the present state of national emergency for another month the third successive extension,

Rail Slowdown The proclamation gives the government powers to keep essential services going. It was the first time since 1926 that a state emergency has extended for

more than two months.

On another industrial front, the prospect of an extended strike hy railroad engineers—now in the 30th day of a slowdown that has harassed commuters—left experts warning of a possible two-day week in industry or extensive electric power ents. About 75 percent of coal deliveries to power

stations go by rail. Mr. Heath told the House that the three-day work week had now saved about 1.5 million tons of coal and reduced electricity consumption by about 21 per-

"To ensure we can, together, see the winter through without further major dislocations, we need to consolidate that achievement and do rather better," the prime minister said. He said coal stocks, whittled

down by the miners' overtime ban, would have reached the danger

point by early next month if no restrictions had been imposed. Mr. Heath insisted the government had no choice but to im-

Despite cutbacks, Britain's production is reported at 60 to 80 percent of normal. Story, Page 7.

pose the three-day work week which already has thrown nearly a million people temporarily out

"We have acted out of necessity." he said in response th ar-guments that the entbacks were

to prevail," Mr. Heath said. "It is not too late to look to the future and plot our course together. Indeed, it is in the interests of the whole nation that we do so and do so as rapidly as possible."

deliberately arranged so as to but pressure on the nuners.

"It is not too late for reason

As soon as Mr. Heath finished his statement, Mr. Wilson rose to

"The whole government o: tration has been to blame all our problems on the miners and to try and turn public anger acausa

#### **Test for New Cabinet**

# Spaniard Gets Death For Slaying Policeman

BARCELONA, Jan. 9 (Reuters:—A young Spaniard was sentenced in death by firing squad here today for killing a policeman, it was officially an-

The condemned man, Salvador Puig Antich, 26, a student, was alleged to be a member of the outlawed Spanish anarchist Iberian Liberation Movement. The death sentence, ordered by

a military tribunal here, must be confirmed by the military com-mander of the Barcelona region. However, the death sentence cannot be carried out without the permission of the chief of starc, Generalissimo Francisco Franco. Political sources said a cabinet meeting ou Friday to be chaired by Gen. Franco would probably deal with the case. New Cabinet

The decision of this cabinet meeting will be of special interest since it will mark a key of newly appointed Premier Cerlos Arias Navarro and the cabinet he chose last Friday. Mr. Arias was propelled into national leadership with the

changes in the cabinet, replacing moderate members with political conservatives, men strong on authority and order.

It was the first death sentence handed down in Spain since the December, 1970, trial of six Basque separatists. Those sentences were later commuted by Gen. Franco.

Puig Antich and two other defendants, Jose Luis Pons Llobet, 17, and Maria Angustlas Mateos Fernandez, 16, were charged with staging an armed bank robbery at the Hapano Americano branch here last March 2.

The military tribunal, after an eight-hour trial, found Puig Antick guilty of shooting dead the policeman when being crrested Sipt, 23 in connection with the bank raid.

The court also senteuced him to 30 years in jail for his part in the robbery. Pons Llobet was also sentenced to 30 years and Miss Mateos got five years for netted 1.3 million pesetas (about \$23,000)

All offenses involving firearms Blanco by a bomb in Medrid on in Spain are tried by military

# Nixon Is Expected to Propose New \$37-Billion Health Plan

By Richard D. Lyons

WASHINGTON, Jan 9 (NYT). -President Nixon is expected to propose to Congress later this month a national health insurance program for all Americans that would cost about \$37.5 billion next year. About \$5.6 billion in new fed-

eral funds would be speut on the

plan in addition to money that would have gone into the exist-ing Medicare and Medicaid programs, plus contributions from employers, employees and states. The plan is outlined in a Dec. 4 memorandum to the President from Caspar W. Weinberger, the Secretary of Health, Education and Welfare. The draft of a sec-

ond memorandum dated Jan. 5 that Mr. Weinberger prepared for Mr. Nixon also has been mode available to The New York Times. Points Await Action

Pinal decisions on five specific points await action by Mr. Nixon hefore the completed bill can be sent to Congress, probably in the last 10 days of the month. As currently drafted, the bill is extremely complicated and long. "It's 150 pages and mounting," is the way one official who has worked on the document put it.

The current proposal, the final version of which Mr. Nixon is expected to refer to in his State of the Union message, is sub-stantially broader than the national health insurance proposal that the President introduced three years ago.

Unlike the earlier version, the new proposal would ald low-income people without children, the unemployed and people who retire before the ege of 65. The package of health benefits also would be broadened to in-

clude coverage for mental hecith services prescription drugs for people not admitted to hospitals, and dental care for children. Higher-income people would be expected to contribute more 10ward their care by paying the

first \$150 of expenses in a year, and 25 percent of the remainder up to a total of \$1,500 a year. The value of the program, which has been given the tentative title of National Health Plan or NHP, is expected to be about \$450 per employee and \$575 for a family The program, in preparation for

seven months, has two parts—an employer plan and a government

The employer plan would mean that employers would purchase for their full-time employees basic health insurance policies from private health insurance companies with a federally directed level of benefits.

After a starting period of 2 1.2 years, employers would pay 75 percent of the premium costs which, in 1975, would be about \$320 per employee. The employee would pay the remaining

The government plan feature of NHP is simed at covering lowincome families and those persons working for employers unable to purchase group insurance policies on the npen market.

In some cases the federal government would contribute part of the premium expense of low-in-

Saigon Apprehensive

# Road Network in S. Vietnam

By James M. Markham

9 (NYT).—North Vietnamese buildozers and South Vietnamese inhter-bombers are fighting a duel in the forested empanses of the Central Highlands. The bulldozers are winning.

As South Victnamese commanders watch apprehensively, North Victuamese engineers are swiftly expanding and improving a skein of roads, lumbering trails that wind down the country's western flank, poking costward at strategic juoctures.

In addition to the much publicized north-south axis of 375 miles known as Corridor 613, the Communists have developed westeast systems that, however thinly, bring to life a nightmare that haunted American commanders in Vietnam; cutting South Vietnam in two.
"South Vietnam has been cut

in two," commented one American here in the highlands. "But nobody has bothered to notice." The rugged west-east trails-"they cannot be dignified as roads," one analyst said—appear to unsettle the South Vietnamese far more than docs Corridor 613. hecause they jut omioously into disputed and government-held

The Communists have reportedly not begun to move large quantities of men and weaponry on the main west-east trail that loops over Kontum city and down to northern Binh Dinh Province on the coast.

#### 80 Missions a Day

But South Vietnamese propeller-driven Skyraiders and A-37 jet fighter-bombers, which are flying up to 80 missions a day in the highlands, have in recent weeks reported knocking out tanks, buildozers and five-ton Russian-built Molotova trucks north and northwest of Kontum.

To the south of Pleiku, pilots said they had knocked out three hulldozers at a less-developed west-east system that is interrupted by the government-con-trolled Route 14 at a place called My Thach.

President Nguyen Van Thieu, who has become increasingly hawkish in public, has personally ordered his highlands command to cut off the North Viet-namese road system, which the Communists themselves liken to the spine and ribs of a fish.

While fighter-bomber pliots have claimed some impressive successes 40 Molotova trucks in one swoop northwest of Kontum, for example—South Viet-namese officers say privately that their limited air force can hit only a fraction of the traffic.
And other analysts say the Communists are still moving the bulk of their supplies down the established bomb-free corridors in Loas and Cambodia.

#### Quarries Dynamited

Analysts say the division-size 470th Transportation Group, a 4,500-man engineering unit infutrated from North Vietnam late last year, is in charge of much of the road building.

The 470th is reported based at

Chu Prong Mountain, 40 miles southwest of here, but its units are believed to be scattered throughout the highlands, working around the clock dynamiting quarries and widening lumber trails and unused provincial roads. "Our troops can hear them dynamiting at night," one intel-

ligence colonel said. With limited help from drafted Montagnard tribesmen used as laborers, North Vietnamese workers have succeeded in recent months in widening trails from Dak To to northern Quang Duc Province to about 15 feet and paving muddy atretches with

The web of roads and trails is thought to have as much political as military intent, giving the Viet Cong's Provisional Revo-Iutionary Government a claim to a swath of territory. To rescue the situation in

Quang Duc, and to prevent the 14 to the south into a mere ex-tension of Corridor 613, Saigon has thrown its entire 10,000-z 23d Division into the embattled But this effort has denuded

# N. Vietnam Bulldozers Carve

PLEIKU, South Vietnam, Jan. defenses in other parts of Military Region II, which encom-passes ell of the Central Highiands and whose vastness has always overextended the South Victnamese. The exposed city of Kontum is now defended by a single 2,200-man regiment, insteed of a division, and there are no regular infantrymen in Ban Me Thuot or in Binh Dinh Province, a guerrilla stronghold.

Even so, Maj. Gen. Nguyen Van Toan, the commander of Military Region II, has been sending precious ranger and militia reinforcements to isolated government outposts that lie near the ment outposts that he hear the Communist road system, hoping to forestall the kind of overwhelming attacks that have occurred elsewhere.

The Communists would appear

to have the next move in Military Region II. Different South Vietnamese commanders have different opinions about what it will be, but most appear to believe that the North Vietnamese will not attempt a major thrust in the highlands until the cloudy weather in March inhibits air strikes. In the meantime, they are setting up anti-aircraft de-

fenses along the road.

The Communists' long-range goal is thought to be to connect Corridor 613 with Route 14 and down to the Viet Cong administrative capital of Loc Ninh.
But to get the road back into
South Vietnam—it now takes a brief detour into Cambodia-the North Vietnamese will have a major fight on their hands for control of the heavily fortified town of Duc Lap in northern

#### BANGKOK, Jan. 9 (Reuters),- and swarmed around Mr. Tanaka's hotel when he arrived from Manila on the second leg of an Asian tour.

Mr. Tanaka drove to the hotel in an official motorcade with That Premier Sanya Thammasak, who had welcomed him at the airport on the outskirts of the city. About 5,000 students, waving placards with such slogans as "Get Out You Ugly Imperialist" and "Imperialist Monster Tana-ka." besieged the hotel gates after police cleared a path to let the motorcade through.

The Japanese leader, wearing the flower garland given to him by Mr. Sanya, looked grim when he stepped out of his limousine as the student protesters roared.

Almost Under Siege A group of plainclothes security men huddled around to pro-tect Mr. Tanaka when he went inside the hotel. The students put the hotel almost under siege, waving hundreds of banners

Police prevented them from

getting past the gates and fence surrounding the hotel, where he will stay 48 hours on a tour aim-ed at allevisting concern over Japan's economic dominance in the region and to ensure con-tinued raw material supplies. Mr. Sanya told reporters after seeing Mr. Tsnake to his hotel suite that he was not happy with the demonstrations, and im-

plied that he thought they he eotten out of hand. But he said that a planned meeting between Mr. Tanaka and a student delegation would take place as scheduled tomorrow.

"I have to let them see Mr. Tanaka so they can express their feelings," the Thai premier said. About 2,000 police were called in to protect the Japanese leader in what officials called the biggest security operation for a visiting dignitary mounted in Thailand, The demonstrations were the biggest seen in Bangkok since student riots sparked the overthrow of the Thai military regime last October.

#### Protest at Embassy

Tonight, students staged a demonstration outside the U.S. Embassy here while others in northern Thailand forced U.S. Ambassador William Kintner to leave a university reception. Both demonstrations were in

protest against alleged CIA inter-ference in Thai internal affairs. About 1,000 students massed outside the embassy after demonstrating earlier in the day against

Mr. Kintner was attending a reception at Chiang Mai University in northern Thailand when about 30 students marched in and hurned a paper American flag in front of him.

American officials said that they also shouted slogans through loudspeaker attacking the CIA, the U.S. military presence in Thailand and Mr. Kintner personally.

They said Mr. Kintner told the university rector that he thought it was best if he left the reception to avoid further The CIA became the target of

student and press attacks last week when the embassy admitted that a CIA agent had sent a fake letter to the premier calling for a cease-fire against Communist maurgents.

#### Malaysia Warning In Knala Limpur, Malaysian

students were warned today against holding any anti-Japa-ness demonstrations during Mr. Tanaka's visit this weekend. A spokesman for the Malaysian premier's office said that the government was not aware officially of any planned demonstrations. but he did not discount the pos-

dbility. The spokesman warned that if the students tried anything, "the forces of law and order would come down hard on them."

Belgian to Visit China BRUSSELS Jan 9 (Reuters) .-Belgian Premier Edmond Leburton will visit China, probably in April, informed sources said here

# Japan, China On Air Issue

By Fax Butterfield

TORYO, Jan. 9 (NYT) .- Foreign Minister Masayoshi Ohira said today that Japan expects to conclude a civil aviation agree-ment with China shortly, ap-parently removing the obstacle which has stalled improved rela-tions between the two countries for over a year.

Mr. Ohira returned Sunday from a four-day visit to Feking where he discussed the aviation controversy with Premier Chou

Since Japan normalized relations with Peking in September, 1972, the Chinese have demand-ed that Tokyo stop flights by Taiwan's China Airlines into Japan and Japan Air Lines to Talwan, before further agreements could be reached.

According to some Jepanese officials, the government now believes it can get around this problem by setting up a subsidiary firm to operate services between Tokyo Taipei on a reduced scale.

#### Dummy Companies

Lines, which is government-owned, the official said. In the past, the Japanese have frequently set Is Recessed mmy companies to trade with Communist countries. At the same time, the officials

added, China Airlines, Nationalist China's flag carrier, would still be allowed to continue its flights from Talpei to Tokyo, apparently with Peking's acceptance. Susumu Nikaido, the chief cahinet secretary and govern-

ment spokesman, said that dur-ing Mr. Ohira's visit, China had shown its "understanding" of the difficulty with Chine Airlines. . The Chinese government has not publicly dropped its insisthat the Taiwan sirline cease its flights to Tokyo and it remained unclear what private agreement Mr. Ohira and Premier Chou may have reached.

#### Trade Agreement

However, during his stay in Peiring, the Japanese foreign minister did sign a trade agreement with the Chinese, despite their long-standing demand that such pacts could not be reached until the aviation problem was solved. When the two countries restor-

ed full ties in 1972, they said that in addition to the trade and aviation agreements, they would also work out shipping and fisheries agreements, and then conclude a World War II peace treaty.

The foreign minister's remark today that Japan expected to conclude the aviation agreement shortly came in a meeting with Kokuyasu Fukuda, the chairman of the ruling Liberal Democratic party's foreign affairs research council. The council, a policymaking body, will be given the draft of the proposed aviation agreement next week for consider-

ation, Mr. Ohira said. Japan Air Lines presently operates 37 flights a week on the route between Japan and Taipei. China Airlines operates about 20 flights to Japan, some of which continue to South Kores, Hawaii and San Francisco

#### Seven Get Death In Plot on Shah

TEHRAN, Jan. 9 (UPI).-A military tribunal tonight sentenced seven persons to death for plotting to assassinate Shah Mohammed Reze Pahlevi and kidnen three members of the roval family.

Five other defendants, including two women, were sentenced to prison terms of three to five The prosecutor charged they

planned to kill the shah and kidnap Empress Farah, Crown Prince Ress and Princess Mahnaz, the shah's granddaughter. The hostages were to be used to obtain an escape plane prosecution said, and the plotters planned to demand freedom for political prisoners in Iran.

#### Three-Year Contract

# France Confirms Saudi Oil Deal

PARIS, Jan. 9 (UPI):-The government confirmed today that it has signed a contract with Saudi Arabia for the delivery of 27 million tons of crude oil over, three

Information Minister Jesn-Philippe Lecat, who made the announcement, said France was bolding consultations with other oil-producing nations in an attempt to make larger deals.

Paris and Middle East news

reports have said the three-year

deal is a barter agreement involving the delivery by France of weapons, industrial machinery and technical expertise, but Mr. Lecat would not comment on this. He told newsmen after today's cabinet meeting that the govern-ment Consultative Committee on

Prices, meeting with newly named Energy Commissioner Pleare Blancard, will announce price increases tomorrow for all petro-leum products. The increases will be effective immediately. Mr. Lecat sought to minimize reports that France was asking Saudi Arabla to sign a 20-year

deal for the sale of 800 million tons of crude oil to France in exchange for modern weapons. But he did not deny there were plans for a prospective oil-for-arms contract with Saudi Arabia or other Arab oil producers.

"We have had far-ranging discussions with oil-producing na-tions," Mr. Lecat said. The threeyear contract with Saudi Arabia was merely an "additional" ac-cord, he said.

Mr. Lecat said "Rivadh [the Saudi capital] is teeming with representatives of other nations." in what political sources said was an attempt to shrug off U.S. criticism that France was going it alone in the search for regular oil supplies.

Bonn Postpones Sunday Ban BONN, Jan. 9 (AP).—The West German cabinet approved today contingency plans for a partial weekend driving ban but indefi-nitely postponed its application view of the improved fuel tuation. .

Spokesman Armin Gruenewald said at a news conference that, on the basis of the latest statistics provided by the oil industry, the government at present sees no need to ban weekend driving for the next two months.

Arab production cuts, which as late as last month caused Bonn to fear a 15 percent drop in early 1874 oil imports, have eased re-cently. Mr. Gruenewald said the oil industry now expects a 5.6 percent shortfall for January in

teft here today for Oman on two-week tour of Persian Gr states to discuss oil supply prop lems, trade expansion and Middle backs from Arab producing coun-

# East Germany Raises Price Of Coal for West Berlin 18%

tomorrow.

By Joe Alex Morris Jr.

has raised the price of brown coal to isolated West Berlin in what appears to be the first use of economic pressure against the city since the process of European

détente set in.

Each side blames the other for the impasse, but from the lacts available west of the Iron Curtain, the issue shapes up as a clear-out case of discrimination against West Berlin, a city of two million situated 110 miles inside East Germany.

As of Jan 1, when the yearly contract to supply coal expired, the East Germans suddenly boosted the price of lignite from 79 to 92.60 marks (\$28 to \$33) a ton. In a belated explanation of tha move they today blamed developments on the capitalist market. They said increased prices there threaten to damage the East Ger-

man economy. What galled the West Berliners as much as the sudden 18 per-cent price rise was that the East Germans for the first time set a lower price for deliveries to West Germany. The new price to West Germany is 83 marks a

Discrimination Charged Previously, a West Berlin senate spokesman said, the East Germans had offered lignite at the same price to both West Ger-many and West Berlin. The new

measure smacks of discrimina-

tion, he said. Lignite is used for about half of West Berlin's domestic heat-ing. Because of the city's unique role in the cold war, large stocks of coal and other vital materials are kept on hand, and the East German cutoff poses no immediate threat. Nonetheless, West Berlin authorities found it West Berlin authorities found it disturbing, because it is the first measure taken by the East Ger-mans since the signing of the four-power agreement on Berlin, in September, 1971, which has a direct bearing on the city's fragile

economy.

The East Germans have however, taken measures directed against other aspects of the quadripartite agreement, notably the recent doubling of the amount of money West Berliners are required to change when visiting East Berlin, obviously designed to

cut down on visiting across the The official East German News Agency today accused the West Berlin senate of interference, in the coal-price matter and warned that this could result only in damage for the West Berlin peo-

ple and economy. The controversy led to a meeting today between East German authorities and the leader of the West German Interzonal Trade Authority, Willy Eleindienst, in West Berlin. The meeting produced no concrete results; and the East Germans stuck to their

At about the same time West Berlin Mayor Klaus Schuetz re-ceived Mikhail T. Yefremov, the Soviet Ambassador to East Germany. It was not made clear whether they discussed the new

coal price. As experts in West Berlin pointed out, the question at stake here is less one of price than of precedent. Even at the higher price, East German coal would be cheaper than West German coal, which would involve higher transport costs, a West Berlin spokesman said The precedent is one of East Germany's making a distinction

between West Berlin and West Germany in its economic dealings. The Berlin agreement re-em-

andon Population Down ONDON, Jan. 9 (AP). The pulation of London, once the rid's largest city, has fallen by estimated 64,000 to a mid-1973 al of 7,281,000, the British gistrar-General announced yeshas been burned mainly in mod-ern Estonian electric power stations that have made the small Baltic republic a supplier of electricity for neighboring regions of the Soviet Union.

Expansion of the shale-mining industry has turned the north-east corner of Estonia into a moon-like landscape visible to rail travelers between Leningrad and Talling, the Estonian capital; as huge waste cones of rock and slag alternate with the scars of

Considered Low-Grade Oil shale is a low-grade fuel with a heating value only about one-fourth that of petroleum or one-third that of coal and cannot be economically shipped over long

But Estonia is poor in other energy sources, and Communist planners—at least according to their calculations—have found it more economical to hurn the rock in minehead power plants than to bring in coal from distant sources elsewhere in the Soviet

The first power plant, known as the Baltic Central Electric Station, began producing power in 1959 and reached its capacity of 1.6 million kilowatts seven years later. A twin installation nearby, the so-called Estonian Central Electric Station, reached the same installed capacity last August when its, last generator went into operation.

Each station will be consuming 10 to 11 million tons of shale a year, so that about 85 percent of the annual output of 25 million tons goes into power generation. The rest continues to be converted into household gas, gasoline and a variety of chemical products in refineries at Kontla-Jarve and at Kivioli, which means "shale oil" in Estonian.

Output in China Little is known about the economics of shale consumption in China, where the industry had its modern beginnings in Man-churia in 1929. Under Japanese rule, output expanded as oil shale was recovered from rock overlying coal in strip mines at the industrial center of Fushun.

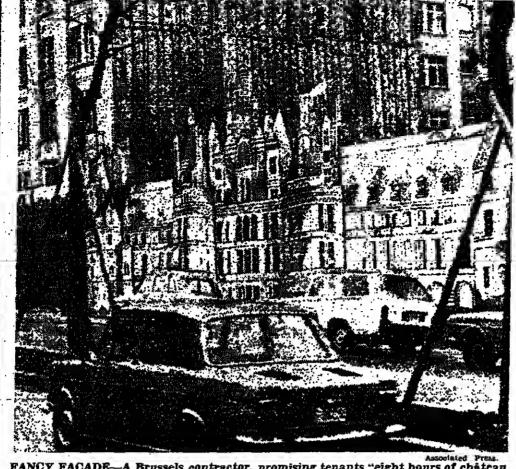

About one million tons of oil a year has been extracted from the shale according to Chinese accounts.

The development of a second major shale deposit began in the late 1950s in south China, where the mining center of Mowming arose in Kwangtung Province. A refinery was begun in 1961. The Chinese may now be producing as much as 2 million ions of shale oil a year.

# States May Not Bar Ballot To Parties Advocating Revolt Drug Raids

WASHINGTON, Jan. 9 (AP). -States may not bar political parties from the ballot for refusing to renounce violent overthrow of the government, the

Supreme Court held today. The court unanimously struck down an Indiana oath requiring the forswearing of violence, that been challenged by the Indiana Communist party.

Five of the justices, led by William J. Brennan jr., found that the Indiana statute violated guarantees of the First and 14th Amendments. The law makes no provision, Justice Brennan said, between the abstract doctrine of violent overthrow and advocacy of action to topple the government.

"... The mere abstract teaching ... of the moral propriety or even moral necessity for a resort to force and violence is not the same as preparing a group for violent action and steering it to such action," Justice Breunan quoted from an earlier high court

The statute which fails to draw this distinction impermissibly intrudes on the freedoms guaranteed by the First and Fourteenth Amendments It sweeps within its condemnation speech which our Constitution has immunized from govern-mental control," he said.

When it comes to deciding whether or not a political party deserves a place on the ballot, the justice continued, a group advocating the abstract doctrine violent overthrow need not be

#### GI Gets 15 Months For Being AWOL 5 Years in Sweden

FT. CARSON, Colo. Jan. 9 (AP) A private who left the U.S. Army in protest against the Vietnam war and spent almost five years in Sweden was sentenced yesterday to 15 months in prison and given a bad-conduct dis-

Richard Dean Bucklin, 28, showed no emotion as the sen-tence was read by the head of an eight-man - court-martial board. The panel deliberated his sentence for about an hour after returning a guilty verdict on two charges of being absent without

The sentence includes reduction in rank to the lowest grade and forfeiture of all pay. Defense attorney Rudolph' Schware called the sentence a disservice to the American people, and said an appeal will be filed with the Army Court of Military

Pyt. Bucklin said he spent the period from Aug. 6, 1968, to July 9, 1973, in Sweden in protest against the Vietnam war. Mr. Schware sought to have the charges dismissed on the ground that Pvt. Bucklin's self-imposed exile in Sweden after leaving his Army unit in Germany was an expression of his right to protest

Col. William K. Laray military judge in the case ruled that Pvt. Bucklin's feelings against the war were no defense:

#### Guaranning Suspect Gets Venue Change

SACRAMENTO, Calif., Jan. 9 (UPI).—Theodore Dean Brown, accused of being a key figure in a plot to smuggle arms into Britain, will be moved to Los-Anxeles to face federal gunrunning charges.

Mr. Brown, 31, a Santa Barbara resident, was granted the change of venne yesterday. He is charged with two counts of delivering arms for international shipment without a permit. The FBI said Mr Brown bought five automatic pistols and recruited a Santa Barbara friend, Allison Rae Thompson 18, to smuggle them to London. Miss Thompson was arrested in London Dec. 29.

Citing Conflict of Interest

#### Jaworski Has Withdrawn From Four Cases

By Anthony Ripley

WASHINGTON, Jan. 9 (NYT). -In four instances in the Watergate investigations the special prosecutor, Leon Jaworski, has withdrawn from personal involve-ment in cases because of possible conflicts of interest.

All involve connections to his old Houston iaw firm, Fulbright, Crooker & Jaworski, When Mr. Jaworski took over the Watergate investigations on Nov. 5, he cut all ties to the firm, which is one of the nation's largest.

In three of the cases from which Mr. Jaworski disqualified

himself, the Houston firm repre-

sents those under investigation In the fourth, the connection is less direct. The tirm represents a client who is in a lawsuit with a possible Watergate defendant. When Mr. Jaworski took the job, he announced immediately to the staff that he would excuse himself from the case against a subsidiery of Ashland Oil, Inc., and Oren F. Atkins, chairman of

the company.

The case had already been prered when Mr. Jaworski came to Washington to succeed Archibald Cox as special prosecutor. On Nov. 13, Mr. Atkins pleaded "no contest" to charges of making an illegal contribution to the Nixon campaign in 1972 and was fined

Company Fined

The Ashland subsidiary, Ashland Petroleum Gabon, Inc., pleaded guilty to the same charges and was fined \$5,000. Two other cases involving pos-sible defendants and the Houston law firm have not been made public. They are still under inrestigation, according to James

The fourth case invoives a Houston-based farm group called the Marketing Assistance Plan. The group has asked the federal courts to stop the larger Assoclated Milk Producers Inc. from taking its memhers away.

Associated Milk Producers under investigation hy the special prosecutor for a pledge of \$2 million to President Nixon's re-elec-tion campaign made in 1970 along with a request to limit imports of

Doyle, spokesman for Mr. Ja-

Associated is also being investigated for an alleged pledge of money related to a plea of

reising milk support prices. Mr. Doyle said the special prosecutor has excused himself from the dairy industry investigation until such time as the lawsuit between Marketing Assistance and Associated is settled.

In all four cases, the overall leadership of the investigations has been in the hands of Henry S. Ruth jr., the deputy special

-Erwin N. Griswold, former Soilcitor General of the United States, said today that he disagrees with part of the White House version of the controversial anti-trust case against the International Telephone & Telegraph

The discrepancy between the White House account and what happened, Mr. Griswold said In a telephone interview, involved the timing of the White House authorization for an appeal by the Justice Department to the Supreme Court of a district-court decision against the government in the Grinnell case, one of three aults against ITT acquisitions. 'Sensitive' Memos

Quite aside from this question of the appeal chronology, the President's account, in the view of those who have followed the multifaceted PTT, case, was open to criticism for not making any specific mention of the numerous meetings of ITT and then administration officials. These in-cluded Vice-President Spiro Agnew, Attorney General John N. Mitchell. Secretary of the Treaaury John B. Connally, White House domestic-affairs adviser John Ehrlichman, White House aide Charles W. Colson and White House foreign-economics adviser

# U.S. Agrees in Talks to End Control Over Panama Canal

By Dan Morgan

WASHINGTON, Jan. 9 (WPI .-The United States and Panama have agreed to eventually end American jurisdiction over the Panama Canal, government sources disclosed today.

Although the agreement is only preliminary, officials described it as a major step toward a final resolution of the Panama Canal question which has stumped. negotiators of the two countries

The agreement came on the eve of the 10th anniversary of anti-American riots in Panama, which spotlighted the issue as a notentially dangerous problem for U.S.

The accord was concluded by U.S. roving ambassador Ellsworth Bunker and Panamanian Foreign Minister Juan Antonio Tack, Mr. Bunker returned to Washington from Panama City last night after a 41-hour visit.

Government sources said that the accord spells out a common standpoint on all basic issues, for use by negotiators who are expecied to spend months drafting final agreement to replace the 1903 Panama Canal Treaty.
U.S. officials withheld the con-

tents of the agreement, but they indicated that the principles cover such issues as Panamanian sovereignty. American payments to Panama in future years, defense of the canal, and the possibility of building a second, wider canal to accommodate large tankers. No date for an eventual transfer

of the 53-mile-long canal to Panama has ever been specified, but officials believe this date is still years away.

I: was understood that mora details might be announced after other agencies in Washington with an interest in the canul, such as the Commerce Depart-ment, the National Security Council and the Pentagon, have had a chance to review the preliminary accord.

U.S. officials have described the 1902 treaty as an anachronism. Among other things, it gave the United States jurisdiction over the 533-square-mile Canal Zone "in perpetuity." Today, the zone is an American enclave in the beart of Latin America, and for many persons in Latin America It symbolizes Yankee encroach-

Last year, the United States agreed that the 1903 treaty should be replaced by a new one that rejected permanent American sovereignty. The United States took the position that the zone should disappear, except for a small area needed by the United States to operate and defend the canal, and that American criminal and civil jurisdiction should be dropped.

According to American officials, the practical questions of im-

#### U.S. Marines Hold Maneuvers in France

SAINT-RAPHAEL France, Jan. (UPI).—Eight hundred Marines from the U.S. Sixth Fleet are carrying out maneuvers in this southeastern coastal area under an American-Prench agreement, military sources said today.

The exercises will last until the

These meetings were disclosed

plementing an agreement are vexing. Some 5,000 of the 15,000 employees of the Panama Canai Company, a U.S. government agency, are Americans. Some Americans living there have grandparents who lived and vorked there. Many of these third-generation "conlans" that their home is a part of the

U.S. officials said that a long to Panamanian sovereignty would be necessary. Some sources said that the length of this period could depend in part on whether a second, or even third canal from the Carlbbean to the Pacific is built. Studies of this possibility are in the preliminary stages in Panama and neighboring coun-

United States.

Government officials said the United States has indicated it is prepared to increase sharply the token annuity it pays to Panama for the canal, from the figure of somewhat more than \$1 million to

over \$20 million. In a concession to Panamanien negotiators, the White House an-nounced last week that it plans to seek legislation that would cede two airfields located in the Canal

#### IRS Reported Set To Decide Nixon **Underpaid Taxes**

WASHINGTON, Jan. 9 (AP),-The Internal Revenue Service is expected to rule that President Nixon has underpaid his federal income taxes, the Knight Newspaper Service has reported. The IRS refused today to confirm or

deny the report.

An IRS spokesman said only that report did not come from an authorized source. The Knight Newspaner Service

said last night that a special IRS task force "is prepared to report that Nixon should have paid capital gains taxes on the sale of part of his San Clemente, Calif. Rebozo and Robert Abplanaip." Last month, Mr. Nixon bared his federal tax returns for his first four years in the White House and acknowledged that accountants and lawyers disagree on the propriety of his 1969-1973 iederal tax payments. They total ed less than \$80,000 on an income of more than \$1 million,

The Knight story said that an adverse ruling on the San Cicmente properly "could cost the first family about \$30,000 in back taxes, plus interest at 6 percent a venr.

The IRS has not yet decided what position to take in regard to another Nixon tax controversy: his deduction of \$576,000 from his taxable income for the gift of vice-presidential papers to the government," the atory added.

Crosby Satisfactory BURLINGAME, Calif., Jan. 9

(UPI).-Bing Crosby, 69, has failed to respond to antibiotic treatment for pneumonia but was in satisfactory condition, his perend of the week, the sources said, sonal physician said yesterday.

Mr. Doyle said one other lawyer had withdrawn from a case because of conflict of interest through prior association with a possible defendant. He said it involved one of the five top taskforce lawyers but declined to

identify which one. Presumahly, the Watergate special prosecution force is made up of 78 permanent employees, nine temporary and two consultants. The work has been divided into fire task forces looking into main

# Former Solicitor General Disputes Nixon on ITT Case

By E. W. Kenworthy

WASHINGTON, Jan. 9 (NYT). in 13 "politically sensitive" memos and letters by ITT officials which were made public last March by the Senate Foreign Relations subcommittee on multinational corporations and the House Commerce subcommittee on investigations. The White House and the Securities and Exchange Commission had Iried to keep them out of the hands of congressional committees by sending them from the SEC to the

Justice Department shortly before the 1972 election. In a statement yesterday, the While House said that on April 19, 1971, President Nixon called then Deputy Attorney General Richard G. Kleindienst and ordered that an appeal of the Grinnell case not be filed. Mr. Griswold's office had prepared the appeal, and the deadline for filing the so-called jurisdictional state-

ment was the next day, April 20. Although the White House occount made no mention of it, Mr. Kleindienst-according to a statement last Oct. 31-told the President he would resign rather than carry out the order, Mr. Kleindlepst sold that on April 20 he got a 30-day extension of time for filing the appeal "to enable the President to consider my posi-

White Rouse Version

As related yesterday by the White House, the President talk-Mitchell on April 21 and was odvised by him that "it was in-advisable for the President to order no appeal."

"The attorney general reason-ed," the White House statement said, "that, as a personal matter, Air. Erwin N. Griswold... had prepared his brief for appeal and would resign were the appeal not to proceed. The attorney general further feared legislative repereuszions if the matter were drop-ped eutirely."

On this recommendation, the White House said, the President reversed his decision of April 19. and authorized the Department of Justice to proceed with the

determinations. But Mr. Griswold said today that he had not received White House authorization to proceed with the appeal until nearly a month after Mr. Mitchell was said to have advised the President that Mr. Griswold might resign if

the appeal were dropped. "I dian't get anthorization until about May 15, 16 or 17," Mr. Gris-wold sald. "It was shortly before the extension would have ex-

Mr. Griswold said he could not explain why the White House waited so long on authorization of the appeal if there were sp-prehension that he might resign. He refused to comment specifically on whether he had actually threatened to resign.

# U.S. Economy: What Went Wrong?

cessfully, of course, than its authors hoped and expected. Good economists repeatedly made sensible forecasts that went wildly askew. Yet, there is a pattern in the miscalculations that invites careful thought. The point of this observation is to chide neither the Nixon administration nor the economists, but rather to suggest the historic change that has overtaken the United States since President Nixon first announced his new economic policy in August of 1971. It seems a very long time ago.

The new economic policy, as you may recall, was a three months' freeze of wages and prices followed by the flexible cootrols of Phase-2. Its purpose was to curb inflation without impeding economic growth. Mr. Nixon was impelled into it by a rise of prices which, by the modest standards of that distant time, seemed intolerable. Consumer prices had been going up at an annual rate of 3.9 percent that year. Over the past eix mooths, by contrast, they bave gone up 9.7 percent, a figure that offers a judgment on the management of the whole exercise. Mr. Nixon's original decision to impose controls, like many of the decisions following it, reflected a wide consensus among professional economists of both parties in the universitles as well as business. What weot wrong?

In retrospect it is clear that no one fully anticipated the tremendous consequences of tha next large step in the new economic policy, the devaluation of the dollar at the end of 1971. Here we come to the first clue to the nature of the most serious mistakes. They were based on good economic analysis, reflecting U.S. national experience for some decades. But they were wrong in matters of psychology and perspective that turned out to be crucial. The modest drop in the value of the dollar was, by every rational estimate, just the devaluation needed to bring our foreign accounts into line, Unfortunately, as we then discovered, there is more to economics than national estimates. · A lot of people abroad had come to think of the dollar as the absolute standard of financial security, and they were holding a lot of dollars. A slip in the value of the dollar, however minor, frightened these people profoundly. They began to onload dollars faster than any well-programmed computer would have expected. That incited speculation, and led in turn to the second devaluation a year ago and the long slide in the dollar's value last spring. The depreciation of the dollar has incited a phenomenon that could be described as a flight from money. People began turning their money into other forms of wealth, from gold bars and real estate to antiques and wheat and copper.

The flight from money aggravated a worldwide commodity inflation that began when all of the major industrial nations, for the first time in two decades, swung from recession to boom simultaneously. In the United States, this swing was fueled by Mr. Nixon's hinge bodget deficits in 1971 and 1972, which produced a rate of growth in America that

America's economic policy over the past turned out to be more than it could sustain. three years has turned out far less suc- That was the setting of our next large mistake: to sell off U.S. agricultural reserves with no thought of the effect on food prices.

America has run farm surpluses so long that it never occurred to anyone of importance in the administration that it could sell too much. The administration wanted maximum farm exports, partly to pull up farm prices before the election and partly to help balance U.S. foreign trade accounts. It succeeded in both respects beyond anyone's wildest imagination. Overshooting the mark, these sales doubled and trebled grain and feed prices with shocking effects at U.S. grocery etores.

Unlike the decision to impose wage and price controls, the decision to lift them last winter was highly controversial. Bot the magnitude of the error was demonstrated with a speed and force that few economists expected. Again, the reasons do not lie in tha conventional processes of economics. They had much more to do with the psychological atmosphere. A lot of businessmen had been badly caught in the first freeze, and they were afraid of being caught again. They began to move their prices up. The trickle turned into a torreot that, by the end of the spring, forced precisely the second freeze that these businessmen had most feared. The attempt to put controls on food prices made matters worse, as it turned out. By the time U.S. food pricee finally started to decline a bit in the autumn, oil prices had started upward. The U.S. wholesale price index for December, published Tuesday, showe the largest annual jump since 1946, when the wartime controls were dumped.

The 1946 inflation was tolerable, in political terms, because people understood why it was happening and, as they had shown in the election that year, they were willing to pay a price to get rld of controls. The current inflation is intolerable bécause people do not really know why it is happening and the economists, in the administration or out, can give them little comfort and still less confidence. The current forecasts have a watery and unconvincing tone.

Economists are moch like weather men. Both take a great interest in why things happened as they did in the past. But their clients and their readers mainly want to know what is going to happen next, Meteorologists can take much time and pleasure in deciding why it snowed heavily on a certain date, five years ago, when it was supposed to rain. But the people who talk to weather men mainly want to know whether It is going to snow tomorrow.

The accuracy of economic forecasting now seems to be lower than it has been for many years, a circumstance that in turn feeds political uncertainty. One consistent source of error is the underestimation of the influence of the rest of the world on the U.S. national economy. The essential trouble seems to lie, not in technical analyses, but in a view of America's position in the world -and of its capacity to ordain its economic destiny-that may be obsolete.

THE WASHINGTON POST.

# Setback in Ulster

Northern Ireland'e week-old Protestant-Catholic coalition government and the whole program for restoring stability and peace to all of Ireland have been jeopardized by the defeat of Brian Faulkner at the hands of his Unionist party council. Mr. Faulkner was obliged to resign as Unionist leader after the of the Dublin government. predominantly Protestant party decisively rejected participation in the proposed Councll of Ireland that would link Ulster with the Irish Republic.

Mr. Faulkner insists that he will continue as chief executive of the new government; but his survival and the fate of the coalition now depend heavily on whether his 18 Unionist colleagues in the 78-member Northern Ireland Assembly remain loyal. This is a shaky foundation to depend on, for there have already been defections from Mr. Faulkner's "official" Unionists to rebel factione opposed to charing power with the Catholics and to any official ties with the Dublin government.

The more extreme Protestant rebels view even an advisory Council of Ireland as a first step toward reunification of the Republic with Ulster; and they charge that in agreeing to it, Mr. Faulkner jeopardized the province's organic link with Britain. Yet creation of the council was requisite for the cooperation of Ulster's Catholic minority and

The program for Northern Ireland is delicately balanced; and the removal of one element could bring down the structure. Mr. Faulkner has no alternative to persevering with the whole package, including eventual establishment of the council. To peranada his fellow Protestants, he will no donbt have to emphasize the council's limited initial ecope and the related proviso that Northern Ireland's status as part of Britain can be altered only by majority vote.

Dublin can help shore up the Uister coalltion by a more forthright acknowledgment that it accepts that proviso, along with the vigorous action it has promised against Irish Republican Army terrorists operating from south of the border.

THE NEW YORK TIMES.

#### International Opinion

#### Russia and Solzhenitsyn

Arrangements are now being made for the broadcast and the question will be taken up by the cabinet tomorrow. "It is the king's voice that the people want to hear, and not so much the king's speech," said an official of the British Broadcasting Company Everyone seems to take for granted that the event will take place.

# The Forgetting of Things Past

By William H. Jack

NEW YORK-What America needs is a return to the bright and shining Camelot hours of John F. Kennedy and to the equally exciting New Society era of Lyndon B. Johnson. These were years to warm the heart of every true liberal-the good old

These were times in which chlef executives exhibited an enormous wealth of guts and pened when Mr. Kennedy sent 16,000 military advisers to Victnam and when this force mushroomed into a Johnson-directed shooting army of 575,000; the Vietnam conflict underscored the incredible failure of Republican presidents to father a war for us

These were the fun-filled years when we experienced the exhila-rating excitement of 40 missileladen Soviet ships steeming toward a nuclear confrontation in an episode resolved only when Mr. Khrushchev chickened out.

Not all of the Kennedy-Johnson pleasantries were associated with distant warfare. It was a fun thing to see more than 100 fires raging within sight of the Capitol. How splendid it was to watch people running every which way with looted television sets, mink costs and smoked ham! How exciting to see firefighters get knocked from thier trucks by

#### Blood, Destruction

With the good old days given meaningful relevance by burnings in nearly a score of cities dead added up to more than 300 and the damage to more than a billion dollars. True riot-lovers enjoyed enough blood and destruction to last a lifetime.

It would be grossly unfair to credit all achievements marking the good old days to a handful of black militants. America should never forget the noble work of dissenting white students, for they were the real focus of all this happy turmoil. blasted libraries, burned down classrooms, set fire to ROTC buildings and dared National Guardsmen to shoot. They broke the jaws of speakers with whom they disagreed. They held captive and slapped around faculty

Can we ever forget these merry pranks? Can we forget they won so much front-page attention that some of the finest events of the good old days were very

Take, for example, the theft of the presidency in 1960 when Richard M. Nixon was on his way to the White House. Our thoughts sour with pride when we recall that Chicago alone returned 100,000 more Kennedy votes than it had registered Democrat voters. Wa can still jump with joy at the memory of vote frauds in Missouri and Texas.

With real fondness, we recall those millions of "poverty" dollars that clinked in the pockets of deserving black politicians. We remember with pleasure those sixfigure handouts to deserving white farmers. Best of all, we cherish the delightful memory of that now-gone 10 percent surtax.

#### Bay of Pigs

Some think the very brightest of the Camelot bours came when Mr. Kennedy withdrew air support from the Bay of Pigs, dooming the freedom-fighters and putting Cubs into Communist hands permanently. In all fairness, we must note

that one of the truly great landmarks was delayed until well after President Nixon took office -the event that the liberal press so delicately terms "the unfortunate Chappaquiddick incident." Teddy Kennedy is the greatesti What other senator could plead mo-contest, accept a suspended sentence, set up the greatest cover-up in history by getting the records sealed, and then win as a reward the offer of his party's second-richest prize? Unhappily he rejected the vice-

presidential nomination. But the polls have installed him as a solid favorite now. This ignites a glowing spark of hope for the future. There is good reason to assume that he will follow his five liberal Democratic predecessore Wilson, World War I; Roo-sevelt, World War II; Truman, Korean war: Kennedy and Johnson, Vietnam war and bring to

us all of the joys of World War -III. For if Chappaquiddick gives us any message at all, it tells us that his unique streogth of character and fine sense of morality ideally suit him to finger the

There is no reason why wa should ablde the colorless dullard now in the White House. This square ended the Vietnam war and brought our prisoners home. He flaunted our wealth before "have-not" nations by being President when we landed men on the moon and brought them home safely. Under his leadership, the country has drifted into a deadly dull routine in which more people have jobs, automobiles, homes and

bank accounts then at any time Today, militant blacks and dissenting whites have nothing good going for them. They are a pathetic bunch of incentivelacking goody two-shoes who fritter away valuable time studying, learning and helping people. They are even turning their backs

on drugs and alcohol. This man Nixon has even robbed us of life's small pleasures. You can no longer look forward to the thrill of getting skyjacked or of burning up the highways at 90 miles an hour. He even had the gall to suggest that it might be a violation of a black child's civil rights when we legally strip

away all of his defenses and forcibly bus him into a hostile environment where mean little white kids beat his ears off.
That's not all. He established

cordial relations with both the Soviet Union and China, lessening the chances we will have all the fun of war. He funneled munitions into Israel during her recent crisis, promoted a cease-fire and provided the framework of a

So let's get rid of him.

Mr. Jack, a retired public rela-tions executive in Florida, describes himself as a "very conser-vative Republican." He wrote this article for The New York Times.

# Spending the Oil Money

By Peter Grose

will probably rise and then drop below today's inflated levels. Finally, though it is bard to JEW YORK.—According to the joke making the rounds of the more cynical international financiers, Arab oil producers should be encouraged to use their windfall revenues to buy up the stock of great American corporations, and then the corporations could simply be nationalized. Beyond this arch suggestion, there is little levity these days about the convulsions threstening the world monetary system, one of the more awesome side-effects of

the energy crists. Scholars hove dusted off their copies of Ricardo and Mill to actions of industrial society with the sources of raw materials. netional division of labor are sprouting; the lines between the rich" nations and the "poor" nations, so firmly in place for decades, are up for re-examina-

Serious analysis of the new financial situation created by the near-quintupling of crude oil prices in the past year has ooly begun, and things are not quite what they seem. To speak, for instance, of an outflow from the industrial world of \$700 billion -or some such audacious figure -over the rest of the decade is somewhat misleading. In the first place, much of that money would return to capital investment and purchases of mamufactured goods. Second, these projections assume that the price of oil will remain constant over years in fact it

measure right now, demand for petroleum products has its elas-ticity, alongside the vivid elasticity of supply; as the price effects are felt, demand—over time—would predictably decline. The Question The question remains, and un-

derlies the current threat of con-vulsions: What will the oil-producing countries do with their burgeoning billions, however much they manage to amass?

For some, notably Indonesia Algeria and Nigeria, there need be little problem. The added government revenues can be readily applied to internal development programs which have long been stymied by lack of local invest-ment capital. This year's oil revenues for populous Indonesia are estimated at only \$7 per capita; for Venezuela, \$250. The ambitious Tranian development program, the shah's "White Revo-lution." can be accelerated somewhat in its target dates. Assuming that the leaders resist the temptation to acquire ever shirtler military devices, at least some economies and peoples in the Third World stand to benefit; some of the so-called rich countries' "foreign aid" would be channeled through the oil markets rather than the governmental dole.

The severe problem is raised by

just five oil countries, all of them

# Letters

#### For Hangovers

May I add to the extensive list

of hangover remedies presented by Jon Swan and James H. Winchester (IHT. Jan. 1); a classic which now seems on the way to be forgotten? Before the war, any Paris bar would know what you wanted if you called for a rince cochon (pig rinse), whose name denoted its function, that of relieving the condition referred to as gueule de bois (wooden face) or mal aux chepeux ("my hair hurts"). It consisted of about an ounce of lemon syrup in a good sized wine-glass, which was then filled halfway up with dry white wine, and the rest the way with Seltzer. I can attest from personal experience that it helps to make the day-after - the - night-before bearable until Time, the Great Healer, has done its job. I have not heard the term rince cochon since the war, except in a book on drinkables by Alec Waugh, who listed the name in some puzzlement, since he had no idea it was a hangover remedy. His contelbution did not do much to preserve the memory of this soother. He offered its recipe, which would have been perfect if instead of rince cochon ha had identified it as Kir. WAVERLEY ROOT.

On Terrorism

Under the title "Terrorism" a letter was printed (IHT Dec. 29-30) and I think it is very appropriste to print a letter like this to show how lucid is the Arab way of thinking. When they have

no one to blame for a shameful and discriminating act of murder, they place it on the Jews. It is also ridiculous to compare such acts with the shooting down of a Libyan plane which was flying over Israeli military territory. Although the pilot was warned to land, he disregarded instructions to do so, What would Libya have done if an Israeli plane had flown over Libyan territory? The same .. and no one would have been excited about it. Israel however felt so deeply over the tragedy of this incident that it paid more than \$30 million in reparations to the relatives of the victims Would Libys, Is-

rael's worst enemy, have done R. TAYLOR.

Les Palmas, Canary Islands.

#### View of Basques

Henry Giniger in his analysis of Spanish politics (IHT, Jan. 2), and recent news reports in general, have given the impression that all Basques are inclined toward violence and terrorism. The essessination on Dec. 20 of Luis Carrero Blanco has been attributed to the ETA, a Basque separatist terrorist movement, which should not be confused with the Basque nation as a whole. The ETA movement is a result of the Basque nation being forced to live under Spain's fascist rule, but is not necessarily representative of the Basque people, just as the Palestinian terrorists are not accessarily representative of the

Palestinian people. GLENN HEINMILLER Bilbao, Spain.

Arab: Saudi Arabia, Qatar, Abu Dhabi, Kuwait and Libya. These will amass revenues well beyond their domestic requirements or even absorptive capacities. Abu Dhabl, for instance, with a population of some 46,000, already has per capita oil revenues of nearly \$23,000. The World Bank estimates that the not foreign assets of these five countries, after deducting for maximum in-ternal development programs, is rising from \$5 billion in 1970 to \$20 billion last year, to perhaps

\$280 billion by 1980. A prime target for investment dustry itself, within and without the producing countries' borders. Another would be projects for developing alternate energy sources, thus parlaying today's oil bonanza into the post-petroleum. future. Venezuela has proposed creation of a new international development bank to help spread the oil riches among less fortunate countries. Moslem leaders have already created an Inter-national Islamic Bank

#### Panic :

The fact remains that, for the foreseeable future, much of the new oil revenues will remain in short-term assets in the traditional financial centers. Already about 6 percent of world liquidity is in the hands of the Arab oil states. Something close to panic hit the money markets recently when the Arabs announced their intention to shift their funds to Arab banks, despite the specific statement that the transfer would be gradual. Soviet ideologists speculated gleefully that the longawaited collapse of capitalist financial institutions was at hand with the threat doming not from a mob outside the gates. but from their own rich clients newly endowed with a sense of

But there is no reason to assume malicious intent among the Arab oil financiers—quite the contrary—and a conclusion more straightforward than economic apocalypse can be drawn: Over the coming years, the Arab states are far more likely to restrain their oil production than go on accumulating funds of declining value that they didn't need in the first place. Their motivation would not have to be peliticalas it was last October-bot rather a show of economic good sense. World monetary crisis would be

collective purpose.

alleviated, following this line of reasoning, but only at the cost of perpetuating the world energy crisis. There is, of course, an answer to both: The world must finally learn to live with less oil,

# Leadership Paradox in Energy Crisi

By Joseph Kraft

WASHINGTON.—How serio is the energy crisis?

Well, government officials des ing directly with it exude a rela ed confidence. But those oblig to handle the economic on sequences of the crisis exhibit case of the litters.

The resolution of the parage is that, while the energy shorts is manageable in itself, policy leadership is required to with the impact on jobs. prices. So, given the abs of public confidence in Mr. Nig it is a deep question whether can pull the country through in crisis without a bad recession.

The shiring example of con fidence is the federal energy at ministrator, William Skaon a day goes by without his holdin some kind of news conference He steps up and answers the me recondite and difficult question His appetite for power is undimmed, and he doesn't missing everybody what to the Refore Christmas he even let be. Nixon know it would be bad form to take the presidential jet to his vacation spot.

The measures Mr. Simon has taken reflect the feeling that the crisis can be easily resolved. He has gone in for limits on Surday driving, car pools and turning down the thermostats. The buly tough stuff, notably rationing he has put off. His policy a a policy of trimming at the edges.

Moreover, his onice petrolem ssning—in the weekly petrolem around body of situation reports—a basically reassuring information according to the latest report have cut the anticipated pet-oleum shortfall for the low weeks ending Dec. 21 in hit. Imports—presumably of oil hot. legged around the Arab boyout were up by 400,000 barrels a day. There was only a slight drawing

When measured against that sanguine outlook, the President's economic advisers sound like Hamlet stuttering his doobts in the face of the simple certifules of Fortinbras. Consider, for example, the figure being cut by Herbert Stein, the chairman of the President's Council

Economic Advisers. Mr. Stein, in the past, has been noted for rosy predictions about the economy. But in the face of the energy crisis he has sud-denly turned bearish.

The other day he warned that during the first six months of this year instation would be-running "at a basic rate of 5 percent with an additional add-or for energy." Though the ad-ministration calculates that unemployment is due to rise by a percentage point to 5.7 in 1974, Mr. Stein said. "the economy might slow down more than we

expect. Equally out of character was Mr. Stein's attitude toward the council itself. Normally he disparages government intervention in the economy as clumsy and heavyhanded. But at a recent meeting of the American Economic Assn. in New York, Mr. Stein called for expansion of the council to deal with the task of economic planning. He said that in the face of the energy critis, a "little agency focusing mainly on manipulating fiscal and monetary policy" was "inappropriate."

No doubt W- Stem has a more delicate job than Mr. Simon. Mr. Simon's basic task is to assure an ample supply of energy-which seems quite double. Mr. Stein on the other hand, has to deal with the impact of a very large price increase in a strategic commodity on millions of decisions by consumers and businessmen in the private sector of the economy. He has to make sure that economic activity does not plunge, that prices do not so through the roof, and that the economy is not skewed in a lopsided fashion by windfall profits to the oil com-

Hirr

But if that task is difficult. it is not impossible. If unenployment threatens, the economy can be stimulated through larger federal outlays. Inflation can b contained through rationing and other devices. Heavy taxes can cut windfall profits.

The trouble is that decisions about spending and rationing and taxes require leadership-presi dential leadership. Bot Mr. Nizon crippled by the continuing scandi of Watergate, has become figurehead President, capable of dealing at best with foreign governments. He commands no comfidence with the public or the Congress. He reigns but does no rule. So long as be continues to hang on in the White House, the energy problem, a problem that is intrinsically not all that ficult, can do terrific harm to

publicity to the slum priest's remarks. The Vatican acknowledged that Pope Paul had received a copy of the letter, addressed to the Pope in his role as bishop of Rome and to the city's clergy. Rome's Pastoral Council, an

advisory body of priests, said that it was considering Father Sardelli's observations, and the newspaper, L'Avvenire, printed excerpts from the letter, describ-ing it as a "positive" contribution.

New Vicar a Liberal

This liberal attitude reflects the personality and philosophy of the Pope's new vicar-general for Rome, Ugo Cardinal Poletti, A northern Italian who is close to Pope Paul, the cardinal has made plain that he is appalled by Rome's social conditions.

In a news conference last October, Cardinal Poletti pointed to the contrast between Rome's wealthy class and the mass of jobless and underemployed people, tha inadequate housing, the lack of medical care and of provision for the aged, the large number of children in orphanages and other institutions and the "absurd" rate of infant mortality-26 per thousand.

The slum priest, in his letter, accused city and church anthorities of ignoring the plight of the destitute inhabitants of the ghettos on Rome's outskirts, where he has worked for the last six years. But he praised Pope Paul for having called nuns from India to carry out apostolic work in poor suburban neighborhoods

Father Sardelli conceded that Pope Paul's occasional visits to outlying parish churches showed a desire to reach out from the Vatican, but said that these visits were marred by the ceremonial and security measures that sur-rounded them. The priest's let-ter said that the Pope "must make a choice and take his place among the despised of the earth,"

The letter critized some of Rome's parochial schools for enrolling mainly children of rich parents, "the oppressors of to-

morrow." Discussing what be described as the constant growth of prostitu-tion, the priest asserted that spending on that form of vice in Rome amounts to \$45 per capita yearly, more than 100 times the average contribution to the building of new churches.

#### 400 Are Rescued From Deep Snow In S. California

LOS ANGELES, Jan. 9 (UPI) -Rescue workers yesterday began removing bundreds of persons from southern-California mountains where they had been isolated by heavy snow. The same weather drop than 7 1/2 inches of rain on lowlands in five days.

By midmorning, 400 persons had been brought out of the mountains in San Bernardino County, including 155 youths from a camp of the Church of Jesus Christ of Latter-Day Saints (Mormon) near Lake Arrowhead.

The Southern California Edison Co. reported yesterday that about 2,500 of its customers in the mountains were without power because lines had been knocked down by snow-laden trees.

More than four feet of snow fell in the region and the San Bernardino County supervisors yesterday declared the sector a disaster area. A new storm off the southern California coast threatens to bring mora rain and snow later this week.

NEW YORK, Jan. 9 (NYT).-Seven oceanographic institutions have joined in a multimiliondollar international effort to assess the long-term effect on the oceans of pollution levels so low they are permissible in drinking water, yet are high enough, some

# Bonn Doubts EEC Can Find **Fund Solution**

The New York Times

BONN Jan. 9 (Reuters).-The Common Market will probably not be able to break the deadlock the regional development fund at next Monday's session of foreign ministers, the West German official spokesman said here today.

Luxembourg'e Foreign Minister Gaston Thorn—the third EEC leader to visit Bonn in the last three days—also expressed pessimism after discussions today with Walter Scheel, the West German foreign minister, who will preside at the Brussels meeting. "A solution is further away than many think," Mr. Thorn Mr. Thorn backs Bonn's proposal that France should forgo any profit from the fund. West Germany claimed today that its differences with Britain and Italy over the size of the

fund could be quickly ended if France would agree to pay in more than it takes out.

French Deny Claim In Paris, officials said Prance stands by its claim for imme-diate benefits from a Common Market regional fund

"To suggest that France is. blocking the regional fund scheme is nonsense," one official said. "And it would be unfair to ask the French government to drop its claims," be added. Under plans drawn np by the Brussels commission, Britain and Italy would be two of the main beneficiaries while West Ger-many would be the main contrib-

Hans Apel, Bonn's chief negotiator, said, "If France were to become e net contributor as West Germany is, we would soon be out of difficulties. This would mean that fewer French regions than envisaged by the Brussels commission would receive aid from the fund."

The nine-nation European community has been brought to a halt since mid-December when Bonn refused to agree to the size of fund proposed variously by Britain and Italy or the Brussels commission. Instead Bonn began pressing for a smaller development purse to be spent on boosting the backward economies of fewer regions. These would include most of Ireland, northern England, Scotland and southern

#### Collision in Holland

FLUSHING, the Netherlands, Jan. 9 (Reuters).—The 2,215-ton Dutch destroyer Noord Brabant today collided at the mouth of the Scheldt River with the 18,704ton British bulk carrier Tacoma City, tearing a 12-foot hole in the merchant ship, Dutch Navy officials said.

fear, to wreak havor in the seas. To this end, six plastic begs, each filled with 2,350 tons of seawater, are to be suspended next September in Saanich Inlet off Vancouver Island in British Cohunbia. The bags, shaped like inverted silos, are 33 feet wide and 98 feet deep. They then will be stocked with

tiny marine plants and animals. and pollutants, such as beavy metals, pesticides and petroleum products, will be introduced into each bag. Similar experiments will be conducted in Loch Ewe on the coast of Scotland. The six-year project is part of

the International Decade of Ocean Exploration. The National Science Foundation has awarded grante for the first two years of the study totaling \$1.276,400. The grants will go to the four

participating American institutions—the Scripps Institution of Oceanography of the University of California in San Diego, the Skidaway Institution of Ocean-ography of the University System Georgia in Savannah, the Woods Hole Oceanographic Insti-tution in Woods Hole, Mass., and the Rosenstiel School of Marine and Atmospheric Science of the University of Miami. The project's total cost is estimated at

The project is known as CEPEX for Controlled Ecosystem Pollu-tion Experiment. Other partici-pating institutions are in Canada

Quarter-scale models of plastic bags, or "marine test tubes," were tested last summer in Saanich Inlet, according to a report by the University of California in San Diego.

Forecast for 2000

As set forth by the Scripps participants, the project "Is designed to belp man learn the long-term effects of pollutants on marine life and to forecast what the world oceans will be like in the year 2000 if pollutants continue to be added at the present

rate. Some fears have been expressed that destruction of the drifting plant life of the oceans by pollution will eliminate a major means for replenishing the oxygen of the atmosphere, Even partial elimination of such plants would undermine the food chain that supports the forms of marine life on which much of mankind is dependent.

The pollution levels, according to the California report, will not exceed those considered safe for drinking water by the World

Health Organization The drifting, largely microscopic life of the sea, known collectively as plankton, includes both plants and animals. The bags of water these organisms will be cultured in will be isolated from the surrounding sea but will be open to the air. The bags will be suspended from a floating framework formed in a honeycomb pattern. They were designed by Case Existological Laboratories in lictoria, British Columbia.

Smaller-scale studies of the effects of pollution on marine plants from off San Diego and on aleae from Saanich Inlet are being conducted as a prelude to

the main experiment. Scientifie coordinators are Dr. David Menzel, director of the Skidaway Institute, Dr. Timothy Parsons of the University of British Cohmbia and Dr. John H. Steelc of the Marine Laboratory Department of Agriculture and Fisheries in Aberdeen, Scot-

# What Is Tearing the American Family Apart?

By Steven V. Roberts

Part II of a two-part series. LOS ANGELES (NYT).-DIvorce is almost always traumatic, but the impact can be iessened by the ability of today's woman to make her own way in the world. As Tilia Vahanian, a New York

psychotherapist, put it: "Women are seeking their own thing with more courage. And they're passing up alimony because they know they can earn their own living."

Once children were almost a total har to getting a divorce," Orleans psychologist. Now with day nurseries and day care centers and a change in attitudes, that is changing. Now, parents feel, it isn't fair to the child to grow up in a household where the parents don't love each other.' Previously they would have felt divorce was an immoral thing to

If divorce is easier, however, the more important question re-mains: Why is it happening? What is tearing the American family apert? In some places, and among some groups, the reasons for di-

vorce are much the same as they almays have been-drinking or a lack of money, for example.

#### Temptations

But sex is another classic reason for divorce, and this area, more than almost any other, has been affected by rising expectations—and temptations. Marriage was once considered an opportunity, sometimes the only opportunity, to have sex, now it often considered a limitation on one's sex life. Tt'e almost impossible in this

Two of the more dramatic shifts in the American temperament during the past fire years are the increasing tendency of couples to seek dirorce and the tendency of courts and state legislatures to make it easier for them to do so. At present our in every three U.S. marriages ends in divorce. In the second of a tico-part series, Steren V. Roberts examines the divorce epidemic.

scried Ralph Keyes, the youthful author of a new book, "We, the Lonely People." "Just walk on a beach on a Saturday and watch the Bikinis-It's absurd? Go to a party and you have some talk about vaginal lubrication. It's like being at an endless and fautastical smorgasbord."

Women are as subject to this stimulation as men, and are increasingly able to act out their impulses. "There is more freedom for women now, many of them are working outside the home." said William Parker, a referce in the Domestic Relations Court of Dayton, Ohio. "Perhaps there ls more opportunity for misdeeds for women than there used to be." As one lawyer put in: "Fa-

miliarity breeds attempt."
Sexual satisfaction is only one of the new demands placed on marriage. As Dr. Richard E. Parson of the Esalen Institute noted, people expect that the whole range of needs will be met -companionship, intimacy, love, "peak experiences" of all kinds. In a recent study conducted by the Family Service Association of America, 87 percent of the mar-ried couples interriewed said that communication" was a major area of conflict in their marriage. Children 146 percent 1. sex 144 percent) and money (37 percent) trailed far behind.

Dr. Farson thinks movies and

television have perpetuated a "syrupy sweel." over-romanticized rlew of family life. "The implieation that a constant state of affection and unity in family life is actually achievable gives cause to rising dissatisfaction in one's own marriage," be said.

*'Culture Tone'* 

The media's message is regarded as a major source of the "culture tone"—as Gary Breinerd of the American Institute puts it in which "people are more aware of their emotional needs."

Another ilurd source is the movement for human rights that started among blacks in the enrly 1960s and is currently flowering among women. Feminists have influenced many people who never joined their movement.

Dorothy Davis, a Los Angeles lawyer, remembers that when the first excerpt from Betty Friedan's seminel book, "The Feminine Mystique," was published in a magazine, "It caused so many divorces you wouldn't believe." In a recent letter to The New York Times, Dr. Paul E. Kaunitz, a Connecticut psychiatrisi. said ing increase in recent years of women seeking dirorces " in the absence of customary reasons."

"The plaint of the wives," he said, "has been consistent: 'I must my identity; I must

no longer be a slave and a prosti-tute, I must find my indepen-

The "cultural tone" that raises new expectations for marriage flows from still another gource: what has been called the new.or "humanistic" psychology. The Gestalt theories of the late Fritz Perks are probably the most influential in the field,

The basic message transmitted by the new psychology was summarized by Dr. Parson, one of the early leaders of the move-

"You are a beautiful, unique human being, fully worthy, with potential beyond your wildest imagination. Moreover, you've got to get yourself into the driver's seat. You are responsible for yourself. If you are burting, fix it! Take action! No one will do

"But what acuon can a person take in Infe?" Dr. Parson adds: "Many of the important thingsrace, IQ, health, even your jobyou don't have control over. The one thing you do have control over is your marriage. You can pick up the phone, get a lawyer

and get a divorce."

This adds up to a very power-

ful message.
At a time when traditional sources of moral authority, from the church to the state, have lost much of their power, the psychologist can become a priest, precelling a gospel of saliation through personal gratilication, and sanctioning almost any ac-tion needed to reach that state ol grace, including divorce. For many, the concept of sin has been reversed. Once you were prohi-bited from indulging yourself; now, fortunately or unfortunately, you are seemed for not doing so.

«The first criticle in this series appeared yesterday.)

### Reviving Great Romantics With Limited Resources

By David Stevens

DARIS, Jan. 9 (IHT).-The tive, compact, sensible and dancedance audience is growing everywhere, and with it the importance of ballet troupes attached to opera companies, and the natural temptation for these relatively limited troupes to tackle-with varying degrees of nerve and imagination—the great romantic ballets conceived for and maintained by the world's great classical companies.

Two recent manifestations of this phenomenon had some things in common-full houses and an effort to sdapt the traditions of well-known works to the exigeu-cles of limited resources. In Frankfurt, the new bailet direc-tor Alfonso Cata and his maitre de ballet Kent Stowell have revised and rethought "Sleeping Beauty" in terms of their 30-member troupe. In Nancy, Louis "Sleeping Ducreux, director of the Grand Theatre, has transferred from Marseilles his collaboration with Rosella Hightower to create an embryonic ballet company andwith far fewer local resources than the German theater-mount two performances last weekend of "Swan Lake," with Maine Gtel-

gud as Odette-Odile. In Frankfurt, Catá had to borrow his Aurora, Judith Reyn, from Stuttgart, and his Prince. Denys Ganio, from Roland Petit, and require his six fairies to fulfill the function of the corps de ballet he does not have. But he went further than cutting back Petipa to the limitations of his dancers, and delivered an inven-

able version of the ballel. In the prologue, the carly 17thcentury world is separated from the world of the fairles, who ar-

rive to bestow their gifts on Anrors after the earth people have gone to bed and the palace has dissolved into starry night. Carabosse is no louger a grotesque character part, but a fully choreographed one, danced very inci-sively by Anne Benna Sims. The two worlds merge only after the commotion caused by Carabosse apparently arouses the household.

Among the most appealing parts of this version is the opening of Act II, leading up to the vision scene, in which the fairies disguise themselves and mime the story of Aurora's death-sleep for the Prince. The Prince's encounter with Carabosse at Aurora's bedside is fully choreographed. requiring the firm intervention of the Good (Lilac) Fairy to defeat the Bad (Carabosse) What cause for disappointment

there is in this version comes

mainly in the final act, for which Frankfurt simply does not have the unneers for all the fairy-tale variations. It opens not with a great procession of courtiers, but with two giant mirrors (the designer is Ekkebard Grübler) in which Aurora and the Prince are shown preparing themselves for the wedding ceremony. What follow are mercly the Bluebird variations and the grand pas de deux iwhich with the Rose Adagio are the main

# Celeriac: A Relatively New Food

WAVERLEY ROOT

CELERIAC, also known as celery root, knob celery, root celery and turnip-rooted celery (and scientifically as Apium graveoleus variety rapaceum: is e modification of ordinary celery in which it is not the stem which has been developed for eating, but the root, swollen into the shape of an untidy turnip. It has the flavor celery, somewhat muffled oy the fleshy texture common to root vegetables.

Celeriae is a comparatively new food, apparently created no earlier than Renaissance times and first described in a botanical encyclopedia, "Historia Universalis

#### U.K. Publishers Take Over Major U.S. Business

NEW YORK, Jan. 9 (NYT) .-In a major transaction that almost completely phases out the once prestigious World Publishing Company, the Cleveland-based American firm has sold its \$10 million a year Bible and dictionary business to Collins Publishers of London and Glasgow, Ltd.

World Publishing, which is a wholly owned subsidiary of the Times Mirror Company of Los Angeles, has been the largest publisher in the world of Bibles. both in quantity and dollar sales. Its Webster's "New World Dictionary" is quantitatively the

largest selling dictionary. As for Collins Publishers, the British company is one of the large publishing houses in the world, selling religious books, Bibles, children's books, dictioand popular reference sima." by the 16th-century French naturalist Jean Bauhin, who called it schium tuberosum. aromatic tuber. At first received as no more than an amusing curiosity, it caught the fancy of German market gardeners, who took the lead in perfecting it to sueb an extent that in Germany It is known not only by its dietionary name, Sellerieknollen, but also as "Erfurt celery." from the place where it is supposed to have been developed. To this day it is eaten most avidly in Germany and the Scandinavian countries. though it is by no means disdained in France, where it is ecleri-rure, nor in Italy, where it is

sedano rapa. How to Cook It Celeriac is treated as most other

root regetables, peeled, boiled. and served quartered or sliced; in my own home, where we often cat it with chicken we slice if after boiling and saute it in chicken gravy. Leftorer slices are excellent cold, in salads, while the leaves provide the same flavering for other dishes as ordinary celery. Like most root vegetables, celeriac is also easy to keep in good condition for a considerable time: dried, it loses some of the sharpuess of its smell other properties.

Celeriac has a higher food value than ordinary celery, of which it has all the advantages, and it is practically devoid of the indigestible cellulose contained in the fibrous celery stalks. It is also considered superior to ordinary celery in folk medicine. which attributes to the more familiar form more merits than it deserves. Real or imaginary, they are all supposed to be pos-

credited in addition with greater clificacity as a puritler of the blood and a remedy for chilbiains. treated by soaking the affected hands or feet in a decoction of boiled celeriae roots and stems.

surplus was 443 million DM.

BONN, Jan 9 (WP) .- After a changed and the dollar is Industry Group Says accession of dramatic rises in alue against the deutsche mark, he dollar moved into a relatively harp downward trend on the oreign exchange market today.

Financial sources credited the eversal to a number of actions aken by the West German govrnment and central bank. Chief mong them was the announcenent that Finance Minister Helnut Schmidt plans to lift Bonn's oreign exchange controls in the lear future.

As a result, the dollar, which arber this week had reached a DM, fell back to close today be Frankfurt exchange at 2.805. This still left ft considerably above the all-time low of 2.3 DM which it fell last summer.

Many financial experts said It appeared likely that the dollarmark ratio would remain at oughly these levels for the time being. And, since the mark is normally the pacesetter among European currencles, they pre-dicted at least a temporary respite in the feverish flight to the dollar that has swept the Conlinent'a financial capitals in recent days.

These sources did caution that further wild fluctuations in exchange rates are possible as long as the uncertainties of the energy squeeze remain. For the moment. though they said that a combination of factors seemed to be restraining the dollar from further his jumps,

One was the trend toward profit-taking by speculators who had gambled on the dollar's rise and who now are cashing in their gains. This was the factor credited with beginning the turnaround of the dollar's fortunes that started yesterday.

In addition, the Bundesbank today sold another \$19.15 million from its substantial reserves to protect the mark from further depreciation against the dollar. That brought to \$162.8 million the central bank's official interventions in support of the mark during the last four trading days. The bank also has sold large but undetermined amounts of dullars in concealed interven-

Traders also were obviously influenced by indications that the energy problem—the chief cause of the flight to the dollar-apparently is not affecting Ger-many as severely as had been feared earlier. Here, the main factor was yesterday's announcement that the price of Libyan crude nil, of which Germany is Europe's biggest importer, had been increased by considerably less than originally reported in

Yet another factor was thought to be the Japanese national bank's decision to resume support of the yen after letting it float down in value by almost 7 per-cent against the dollar. But the biggest impact, in the

view of banking and economic experts came from the news that Mr. Schmidt's under secretary. Karl Poehl, had outlined to the cabinet today plans for gradual, removal of the foreign exchange controls introduced in 1972, when Bonn was trying to stem a rush into the mark from the then

weakening dollar.
Government sources said Mr. Schmidt had decided that the controls had served their purpose, namely to prevent the mark from becoming too expensive a currency, and were no longer peeded now that the situation has

#### Rise in Cost of Oil Is Set at \$50 Billion

PARIS, Jan. 9 (AP-DJ).—The non-Communist world will have to pay an additional \$50 billion this year to import its oil requirements, according to a co-fidential report prepared by the sec-relariat of the Organization for Economic Cooperation and Development (OECD), it was learn-

cd today. The report, s. it to the sovern-ments of the 24 member nations, will be discussed by the OECD's balance-of-payments committee in Rome next week.

The OECD experts have also estimated that out of this sharply increased oil revenue, only be-tween \$10 billion to \$20 billion will return to the major industrialized nations in the form of purchases of industrial plant and other capital goods.

# FINANCIAL NEWS AND NOTES

Volkswagen Reports Higher Sales

Volkswagen group sales rose to more than 17 billion deutsche marks in 1973 from 15.996 billion in 1972, while car sales rose to about 23 million units from 2,192,524, the company reports. The parent's sales rose to about 11.8 billion marks from 10.398 billion in 1972 and the parent's carnings rose slightly in 1973 from \$6.4 million marks in 1972 but were still unsatisfying. VW says. The firm notes that the changes in parities during 1973 caused substantial cost increases that were only partly offset by price increases. VW points out that it was able to hold its sales in Europe at 1972 levels only by accepting lower earnings on each unit sold.

Barclays Unit to Buy N.Y. Bank

Barclays Bank of New York, after one abortive attempt to acquire a suburban bank, received approval from the New York State banking department to acquire First Westchester National Bank of New Rochelle. Barclays Bank is a subsidiary of Barclays Bank Ltd. of London. The transaction is subject to approval by First Westchester shareholders and by the Federal Reserve

Maxwell Group Bids for Pergamon Singer & Friedlander, a London merchant bank, announced a bid by the Robert Maxwell group to

take over Pergamon Press Ltd. The offer is 11 pence for each 16-pence ordinary share. Mr. Maxwell and his family own about 27 percent of Pergamon's shares. The offer is subject to a sufficient number of shares being tendered for Mr. Maxwell to gain control of the scientific journal and book publishing firot. The bid is also conditioned on receiving government approval and Pergamon board agreement by Jan. 18 to recommend the offer.

Algeria Said Ordering Gas Tankers

Algeria has ordered live ilquefied natural gas tankers worth over 2 billion dinars tabout \$240 million) from French shipbuilding firms, El-Moudjahid, the government-owned newspaper, reports. The agreement, signed Dec. 28, involves carriers with a capacity of 125,000 cubic meters. Two will be built by Chantlers de la Ciotat. two Constructions Navales et Industrielles de la Mediterrance and one by Chaptlers de l'Atlantique, the newspaper says. The orders are con-ditional on "financing arrangements" which the newspaper says may be settled by month-end. The newspaper points out that under the con-tracts already signed for deliveries of huge quan-tilies of natural gas in the United States and Europe. Algeria has reserved the right to ship 50 percent of deliveries. Algeria currently has one gas tankee with a capacily of 45,000 cubic

Because Earnings Would Suffer

# Foreign Slump Threat Hits U.S. Stocks

tions in 1972 for companies re-

NEW YORK, Jan. 9 (AP-DJ). -More than a blind, unreasoning fear of heights is behind the contiming fall of some leading U.S. growth stocks from their dofty price-earnings perches. At work is a kind of reverse leverage.

Poreign - earnings expansion, which played an increasing role in many success stories, is threatened by slowdowns or recessions in Japan and Europe at the same time that growth rates at home arc also in jeopardy.

In previous U.S. recessions, international companies more than nffset domestic profit sluggishness with faster growth in rapidly expanding economies abroad. For some companies, practically all of their growth came from international operations in the past five or six years. If the 1974 business slowdown is worldwide, a growing possibility, analysts dn not expect the companies to fare as well as in past recessions.

Coca-Cola fa a case in point. In recent days, analysts have been lowering their 1974 es-timates, mainly because the softdrink concern has been getting more than 50 percent-as much as 58 percent by one estimate-of its earnings from foreign operations. Analysts expect tough Europe to crimp consumer incomes-and Coca-Cola sales and earnings growth along with them. In addition, the fall of foreigncurrency values against the dol-lar could work against the company's results.

In a recent look at several major U.S. companies with opera-tions abroad, Merrill Lyoch, Pierce, Fenner & Smith raises the question of how well they would fare if slowdnwns abroad colucide with one in the United States

#### Board Dissolved At Alfa After Row Over Expansion

MILAN. Jan. 9 (Reuters) .- The board of directors of Italy's state-controled Alfa Romeo motor company has been dissolved following the resignation of seven of its 13 members, a company spokesman said today.

The move follows a dispute between board chairman Giuscope Luraghi and the seven over the company's expansion and investment policy.

The seven directors wanted a new plant to be built by Alfa in the depressed south of Italy to produce 70,000 cars a year.

But Mr. Luraghi and five others argued that this was not justified in the present economic climate and that any production increases should be brought about by expanding the company's existing plant at Arese, near Milan

The affair has been interpreted by several Italian newspapers as an attempt by the Christian Democrat party, senior partner in the government coalition, to oust Mr. Luraghi, a Socialist. Most of the board members who resigned are Christian Democrats.

A special meeting of shareholders will be held on Jan. 24 to decide the next step.

Here's a capsule rundown on cent of sales and 52 percent of the importance of foreign opera-

viewed by Merrill Lynch: Burroughs-36 percent of sales and 41 percent of net from ebroad: large profit gains abroad came in poor years at home, and vice-versa, to provide consistent nverall results.

• CPC Internations—half of revenue and two-thirds of net from abroad in 1971 and 1972; entire profit expansion from 1967 through 1972 was from foreign earnings gains.

• Gillette-14 percent of sales end 51 percent of net from abroad in 1972: domestic profit margins down from 12 percent in 1967 to 7.5 percent in 1972, and foreign margins level at 10 to 11 per-

• IBM-44 percent of sales and 54 percent of net from abroad: profits up 50 percent between 1968 and 1972 but the entire gain came from earnings growth abroad; domestic net off 11 percent in 1969 and 8 percent in

Thternational Flavors-59 per-

than doubled between 1967 and 1971, accounting for company's entire profit increase of 50 percent; 1973 was first year of balanced growth.

• International Horvester-22 percent of sales and 36 percent of net from abroad; foreign net tripled in 1973.

• Pfizer-49 percent of sales and 57 percent of net from abroad; profit margins abroad of 11.2 percent in 1972 versus 7.7 percent on U.S. operations. • Woolworth-39 percent of

sales and 83 percent of net from abroad in 1972; domestic profit margius have dropped to 0.6 percent but foreign margins have held steady at 4.5 percent af sales since 1969.

• Xerox-37 perceut of sales and 46 percent of net from abroad; since 1967, overseas profits grew more than 40 percent annually while domestic net increased at a 10 percent rate; 75 percent of international business

# Dow Index Plunges 27 In Heavy N.Y. Selling

Heavy selling battered the New York Stock Exchange today with brokers reporting general concern about the economic outlook. The Dow Jones industrial average plunged 26.99 points to 834.79. About 1,320 issues closed lower on the day with about 250 gaining. Trading was active, with volume at 18.07 million shares compared with 19.08 million yesterday.

Brokers related the heavy selling in part to inflation. The government reported that wholesale prices continued to rocket higher in December. Brokers said selling was also due to a report that soaring oil prices could cause severe trade deficits a mong Western industrialized nations.

Analysts added that the market showed the elfects of an AP-DJ report that corporate foreign carnings expansion is threatened by slawdawns or recessions in Japan and Europe.

In the gold group. Dome Mines fell 8 3 4 to 173. Homestake Mining 6 to 87 3 8. ASA 3 3 8 to 79, and Campbell Red Lake 6 1 8

#### Japan Boosts Wheat Orders

NEW YORK, Jan. 9 (AP-DJ),-Japan has catered the world wheat market in force, placing orders for large quantities to supply home neces through September. Minst of the wheat was bought from Canada.

Japan usually buys wheat on a week-to-week basis, but due to international currency uncertainues and tight world wheat supplies. Japanese sources said wheat orders have been placed to cover needs until September.

Japanese purchases of Cana-dian wheat for delivery from May through September are estimated at 33.6 million to 36.4 million bushels. Late yesterday the Canadian Wheat Board said it with-drew all export wheat offers until It is able to compile the volume nf wheat sold to Japan.

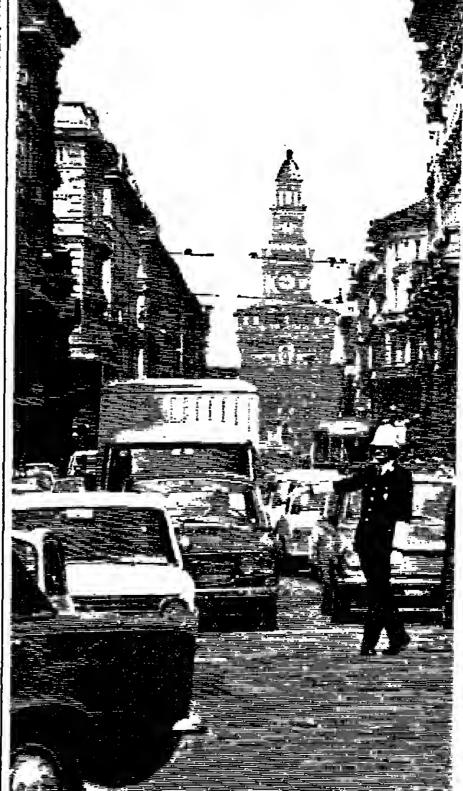

U.S. wheat export sales to Japan are estimated at 5.6 mlllion bushels for shipments starting in February and ending in

According to Agriculture Department sources, the Soviet Union has agreed to hol down the amount of U.S. wheat it, will lake until the new erop comes in later this year.
Meanwhile, U.S. wheat export-

ers ore being urged to delay foreign deliveries to conserve the dwindling supply of bread grain, the Agriculture Department dis-

The department has estimated that the wheat reserve will be 210 million bushels next July 1. That would be less than half the wheat on band last summer and the smallest stockpi'e since 1948. Exporters were told in recent weeks during "informal discus-sions" that they could help ease the supply situation by delaying

# One good idea led to another. A good idea in Canada led us to Milan.

Over 100 years ago, we saw Canada's need for financial backing to develop her rich natural resources. That was our first good idea. It led to other good ideas in Milan and in many other places in the world: Good ideas about trade, investment and international financing.

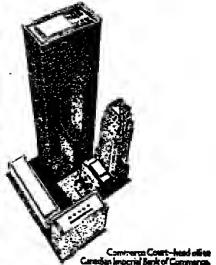

Today we have over 1500 branches from the Atlantic to the Pacific and offices in Australia, Europe, Japan, London, the U.S.A. and throughout the Caribbean. We are one of the world's largest banks with over \$16 billion in assets. We have seen a lot of small businesses

become big businesses and a lot of good ideas become realities. If you have a good idea, come and talk to us. We know what good ideas can lead

to. That's how we became one of the world's largest banks. For further information write to

Dept. PH4, Canadian Imperial Bank of Commerce, P.O. Box 408, 2 Lombard Street, London EC3P 3EU, or our head office - Commerce Court, Toronto M5L1A2, CANADA.

#### Ads.

It's fun to read the ads in the Herald Tribune for people, places, goods and services all over Europe, all over the world. And if you want to place on ad -- a single a Personal item or a whole campaign no better medium than the

Trib. Rates are reasonable.

# Food.

The fine art of good eating is a favorite European pastime --- and gournets eat up the Tribune's food articles. Where to ear what, and for how much, is covered regularly in the feature pages of the Inter-national Herald Tribune.

#### **REMY-MARTIN**

#### L INTRODUCTION

The house of E. REMY-MARTIN & Cie was founded in 1724. It was turned into a Société Anonyme on its two hundred anniversary year, fifty years ago. The entire equity capital of French Francs 35 m. is owned by the families of M. André HERIARD-DUBREUIL, Chairman of the Board and Chief Executive Officer, and M. Max COINTREAU, joint Managing Director and a Director

REMY-MARTIN is known for exclusively specializing in the marketing of "eaux-de-vie de Fine Champagne" from the first two growths: Grande Champagne et Petite Champagne, of the Cognac region. The legally binding phrases on the labels, such as V.S.O.P. or Vieille Reserve, are an indication that the REMY-MARTIN's cognacs have been aged for notably longer than the average period. The company's position among competitors is the first one in this specialty.

Quite obviously, high quality standards of this kind can only be achieved

through a policy of low inventory turnover. On March 31, 1973, the company's aging facilities contained an equivalent of 49 million bottles, both directly owned and under option. It amounted to approximately seven years of sales, against an average of three years in the trade.

#### IL ACTIVITIES

Behind Courvoisier, Martell and Hennessy, whose global sales are bigger, REMY-MARTIN is fourth amongst the Cognac merchants. For fiscal year 1972-1973, cosing on March 31, 1973, unconsolidated turnover was French Francs 115.7 m., 88.7 % of which had been earned on foreign markets. As a rule, the compagny's shipments are made in bottles, with very few exceptions.

From FF. 71 m. in 1970-1971, tumover has grown at a very fast pace, reflecting a profound change in the company's human resources. Growth for the last three fiscal years, and the year in progress, in shown

	1970 -1971	1971 -1972	1972 ~1973	1973 -1974 (estimate)
Turnover (net of excise and taxes). Nat cash flow Accounting Profit.		FF 78 m. FF 15 m. FF 3.35 m.	FF 118 m. FF 25 m. FF 0.51 m.	FF 150 m. FF 36 m. FF 3 m.

This strong rise in activity and cash flow is due partly to higher volume, and partly to improved marketing conditions and productivity.

REMY-MARTIN's export growth in the recent years can be compared to that of the trade in general (bottled Cognac only):

			• •	
			1.09.1972/ 31.08.1973	Three year trend 1870-1871 10 1972-1973
Million bottles				
Total Cognac region	<b>6</b> 6,876	. 87.116	71,136	+ 6%

Million French Francs				
Total Cognac region	811.502	923,306	1,186.428	<del>1</del> 46%
REMY-MARTIN	71.027	90,985	136.512	+92%

#### IIL SUBSIDIARY COMPANIES AND INTERESTS

Whenever they deem it necessary, REMY-MARTIN have a practice of actively taking part in the distribution of their products. Subsidiaries have thus been established, or interests in companies acquired, in France, Germany, Belgium, Switzerland, Canada, Australia, Hong'Kong... The Company's products are entrusted to sole distributor in other countries.

Such operations or acquisitions have often been performed in cooperation with third party companies, such as Cointreau, Izarra, and the British groups Hutchison and A.S. Watson Ltd.

A diversification policy has moreover been initiated by REMY-MARTIN, notably with acquisitions in the fields of exceptional quality Champagne wines Krug), apéritifs (Picon), and rhums (Saint-James), with Societe Cointreau as co-manager for the three operations quoted.

#### IV. FINANCIAL HIGHLIGHTS

The uoderneath tableau shows the evolution of balance-sheets in the

Simplified Balance-Sheets	1970	1971	1972	1973
Fiscal year closed on March 31. (Million French Francs)				
Stockholders' interest	65.45	75.32	87.84	108.35
Total Long term Funds employad	109.02	121.40	140.30	192,32
Property and Othar Assets	22.80	28.57	35.41	41.60
Net Working Capital	86.22	92.83	104.89	150.72
Total Funds Invested	109.02	121.40	140.30	192,32
Total Assats or Liabilities	154.80	182.82	219.80	276.32

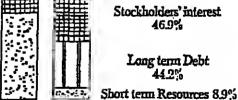

But the fundamentals of the Company's financial policy are better illustrated in the following graph, showing the relative weights of the principal balance sheet accounts over the same period:

#### The financing of growth from 1970 to 1973.

Total assets have increased by FF. 91.47 m. in three years. The same amount was distributed between the various asset accounts and resources in the following manner:

> 20.5% Inventory 79.5%

Property and Other Assets

Stockholders' interest 46.9%

Long term Debt 44.2%

The above percentages convey the Company's earning power and the determination of the Directors to finance rapid growth while maintaining the long term equilibrium of funds employed.

Cognac, January 7th, 1974.

#### Statistical Sources: Bureau National Interprofessionnel du Cognac.

NB. The statistical period used (from September 1st to August 31st) does not coincide with REMY-MARTIN's fiscal year, and the definition of turnaver is not an accounting definition. The above tableau can thus be used with a view of comparing the Company's activities with that of the trade in general, and for no other purpose.

Manager

Leading manufacturer of electronic controls and systems for industrial use, with a worldwide organization headquartered in Massichusetts, U.S.A., eeeks a Controller for its European operations headquartered in Brussels, Belgium, including manufacturing facilities with sales subsidiaries in several other European countries.

Candidate will be expected to take full charge of the accounting function for the European operation, but equally important, will be expected to provide financial and operating control for the European operation from the standpoint of assuring the achievement, in concert with and for the European General Manager, of projected sales and earnings, expense control, and production control. Should have a degree in business administration, ten years experience in industrial accounting with an industrial furm, and preferably be a chartered or certified public accountant. Candidate should have had extensive experience in the United States with industrial companies, but may ow be discharging these responsibilities in the United States or Europe. Business judgment and leadership qualities will be important to success as well as his professional background. Language proficiency desirable, but demonstrated management capability more important. Complete fluency in English is essential.

The position offers an unusual career opportunity for individual having sound accounting background and qualified to undertake such a controllership responsibility. Salary open.

dummy in this position:

rounds of trumps left the lead in

One of the rarest defensive plays in the game is known as the Crocodile Coup. A defender with two non-touching honors must play second-hand high to swallow his partner's honor and matter himself of the lead. When the opportunity for this arises, as it did on the diagramed deal, it is usually missed.

One diamond is the orthodox opening bid with the South hand shown. One club is virtually as good, but South gives himself a rebid headache if the bidding happens to go one heart—one spade—pass. As it was, West did overcall one club with one heart, and North and East each

raised their partner's suits.
South pushed on to three clubs,
a good decision, since two hearts would have succeeded without difficulty. West opened and cashed two heart winners. He followed with the spade ace. East encouraged with the spade nine, and the next spade lead was taken by the king.

A club to the ace showed the bad trump division, and the dia-

James STOOP CABLE PETISH ANYWAY

ON CRIME WRITING By Ross Macdonald. Capra Press. 45 pp. \$2.50 HAIL TO THE CHIEF By Ed McBain. Random House. 182 pp. \$5.95.

THE TUROUOISE LAMENT By John D. MacDonald. Lippincott. 287 pp. \$6.95. Reviewed by Gerald Walker

made for a double play, Hammett to Chandler to Macdonald make for a triple strand in a single tradition in the so-called "hard-boiled" American mystery novel. Just how hard-boiled is one of the things Ross Macdonald discusses with lucidity and a kind of modest elegance in the first of two essays that constitute his small but valuable book, "On Crime Writing."

Dashiell Hammett's Sam Spade was not just tough, although he was for starters. "Sam Spade was submerged and struggling in tragic life," Mr. Macdonald notes, accurately, as one expects from the most subtle currently practie-ing mystery novelist. ". Spade was a less obvious projection of Hammett (who had been a private detective himself] than detective heroes usually are of their authors. Hammett had got his early romanticism under strict fronic control. He could see Spade from outside, without affection, perhaps with some bleak compassion... Spade's deprivation of his full human beritage (in "The Maltese Falcon," turning his lover over to the police receiving the falcon stripped of its jewels]... [makes] his story tragedy, if there is such a thing as dead-pan tragedy. Hammett was the first American writer to use the detective-story for the purposes. of a major novelist, to present a vision, blazing if disenchanted, of

Mr. Macdonald also discusses his immediate predecessor, and Dashiell Hammett's success Raymond Chandler, for whom Robert Altman's updated, but spirit-true film version of "The Long Goodbye" has triggered (if one can put it that way) a new surge of interest. He quotes Mr. Chandler's now-famous prescription for Philip Marlowe: \$6.95 ...Down these mean streets a man must go who is not himself mean, who is neither tarnished nor afraid... The detective... is hero, he is everything ... He must be the best man in his world and a good enough man for

any world." You read that and start to nod in agreement before Mr. Mac-donald issues the caveat that Mr. Chandler's vision, though dis-enchanted, too, "lacks the tragic unity of Hammett's." Then, like the teacher of writing and literature that he used to be Mr. Macdonald goes on to specifics. "No hero of serious fiction," he writes, "could act within a moral straitjacket requiring him to be consistently virtuous and un-airaid. The detective-as-redeemer is a backward step in the direction of sentimental romance, and an over-simplified world of good guys and bad guys ..."

Compared to the protagonists of Mr. Hammett and Mr. Chandler, Mr. Macdonald's own Lew. Archer is, as he says, "a hero who sometimes verges on being an anti-hero." Or, to put it another way, Archer is more of the I-ama-camera school of narrator, being not the point of focus, but the means. "An author's heavy investment in a narrator-hero can get in the way of the story and blur its meanings," Mr. Macdonald plainly observes, "as some of

ACROSS

THNKER to Evers to Chance Chandler's books demonstrat This is not to imply that Arch is a mere "eye." He is a who man with a marked capacity feel for and become involve his clients' problems. In the recent books, Archer has in displayed this risky tende more frequently and Mr. h donald himself has been take the risk of making his books m personal and distinct, so far w

The second Macdonald en has to do with the writing "The Galton Case" and the qu tion of identity, which runs is the thread of Arizons through thine Lew Archers that follow It tells the reader openly and engagingly why Mr. is so concerned with the subject Unlike the experience of reading many other mystery writers I end with the feeling that this is an author I would like to ga to know, a nice man who happ to know a lot of dangerous truth about people. Ed McBain (who, as everyon

knows, is Evan Hunter) is an other practitioner of the crate weighing in here with "Hall to the Chief," the 23d in his soft Precinct series. McBain Hunter, who usually writes better, in-beit slick, but drivingly page stuff under his pseudonym timeunder his real name (now there's a mystery to unravel), has come a cropper by taking his emphe off the coppers. Detectives Stew. Carella and Bert Kling are or the case involving six bodies found in a ditch, one an infant, but we are also tossed a lot of pages about a violent, cynical, lying, paranoid youth-gang leader. Wait: six months and there'll be a bet-

ter 87th Precinct along. The anthor of the justly famous Travis McGee series, of which. The Turquoise Lament is the first to appear initially in hards covers, is a MacDonald who knows: everything dangerous that there is to know about people. But just as his name is spelled differently. there is another difference that is not so slight. He scares the hell out of me. I not only cont

want to get to know him. I'ms also even afraid to meet him. There is one scene in this surperbly plotted and almost the bearably suspenseful story (the prose is Hemingwayesque, though a bit more pop than Papa which McGee is deciding how oes to "open up" a man whose greed has touched off a chain of killings committed by someone over whom he has a hold. The chair is now leading toward a young woman in whom McGee hrs. taken a passionate, middle-aged interest. McGee decides to frivit. en the other man by pretending to intend to kill him in cold bloodon a lonely back road. When he has the other man bound and heipless, he finds himself wan'ing'to kill him; and you, the reader. want the same thing. The man deserves to die and John D. Mac-Donald makes you want it. Ch. yes, the man opens up and tells McGee everything. also a wryly apt, middle-aged

#### urrall Sets lark Again ı Swimming

YDNEY, Jan. 9.—Originally, ny Turrali, small and fragilering, wasn't supposed to swim today's 1,500-meter freestyle at of the Naw South Wales molonships. But her form week was good enough to a record and she said she m't tired.

o today, Australia's newest mming sensation set her secslashed 1.7 accords off tha rk she set a month ago.

he wonder girl swimming ne for the last 800 meters. cked 16 minutes 43.2 seconds. urday night, the 5-foot-2-inch pound girl set an 800 freestyle rk with 8:50.1.

When Jenny set her 800 mark turdsy and the 1,500 record it month, she was pushed all way by her best friend and lining partner, 14-year-old Sally ickyer. But Miss Lockyer passed today's race so that she could mentrate on a 200-meter med-

y event.
With no one extending her, iss Turrail was two seconds oif er record-setting schedule after 10 meters. But Jenny covered ne last two laps in 646 seconds ach and later said that if was only when she heard the announcer "getting protty excited" lint she realized she was within each of the record:

After the race, ber coach, orbes Carlile, said, "The in-redible part about the swim was 1 4:31 and the last 400 in 4:24.3. was an incredible effort." Olympic swimmer Narelle Moras - nished second, 40 meters behind

financial aid in any sport while under a professional contract in .another.

Philip O. Krumm, president of the U.S. Olympic Committee, said today the NCAA may have acted hastily in changing the rules. Krimm, however, was not opposed to the change.

"I just think the NCAA acted hastily," Krumm said. They could get some of their athletes into trouble as a result of this change. We want those athletes in the Olympic movement, but we have to live by Olympic rules and those rules, for the moment, do not permit an athlete to receive any monetary reward for practicing sport."

Kromm said the eligibility issue is probably the most vexing problem the International Olympic Committee must settle before the 1976 Games at Innsbruck, Austria, and Montreal.

In other action, the NCAA's division I schools—the so-called major athletic schools—voted to keep the year-old 2.0 grade eligibility requirement while divi-sions II and III threw it out.

The division I schools voted to keep the 3.0 requirement by a 172-38 margin, then rejected proposal to reinstate the old 1.5 projection averaga, 149-52.

The 2.0 average is a cumulative high school grade, while the 1.6 rule meant projecting a 1.6 col-lege average on a scale of 4.0.

Stanley J. Marshall, director of athletics at South Dakota State University, said the 2.0 rule proved very difficult to implement in particular because of the great difficulty in obtaining high school transcripts. Also, there was a strong feeling that 2.0 was near no standard at all and probably not worth the effort of

The 2.0 vote sets up a double standard in cases where a school is division II in football and division I in all other sports. Football players at those schools must have a 2.0 high school average while other athletes do

SMU on Probation

SAN FRANCISCO, Jan. 9 (AP). -The Southwest Conference has pot Southern Methodist Univer-sity on one-year probation for giving cash bonuses of \$5 to \$25 to members of the football team's specialty units for making

In taking the action, the con-ference also endorsed the recent move by Dr. Paul Hardin, president of SMU in which he relieved Dave Smith of his duties as director of athletics and reduced his contract as head football poach from four years to one year. Dr. Hardin had also disclosed that members of the athletic staff overpaid players for selling

# Diamonds, Furs\_Not Ali—Are Frazier Friends Former Champs

# Fight Jan. 28

By Red Smith

NEW YORK, Jan. 9 (NYT) .-Henry David Thorean has warned us to beware of all enterprises that require new clothes, but the hermit of Walden has never been Joe Frazier's favorite author. The former heavyweight champion of the world, whose next major enterprise is a 12-round match with Muhammad Ali, visited New York this week for a fitting of an ankle-length white mink coat (he has a black one back home in Philadel-phia). He was chic as a fira eogine with his wide-brimmed hat of red felt, red turtle-neck, red shoes with three-inch heels and a suit of black-and-white plaid. On his left pinky was a cluster of 18 modest diamonds oo his right a solitaire that could once have been the eye of a pagan idol. His even teeth gleamed through shruhhery neatly trimmed. Even Solomon in all his glory, according to a reliable source, was not more fetchingly arrayed.

"Are you buying the coat?" he was asked. "Or is it a gift? A few years ago when some furrier gave Joe Namath one as a promotion stunt, reporter Dick Young vrote, 'A chorus girl 1 know wonders wnat Joe had to do to get that mink coat.' "I'm buying it," Joe said em-

phatically. "The way you dress," it was suggested, "nobody would sus-pect that you had ever lost the title. Lucky those burglars didn't get into your wardrobe. What's been going on with you guys? Eddie here gets fired by Norton and your gym gets

Brave Thieves A recent dispatch from San Diego reported that Eddie Futch the trainer who got Ken Norton in shape to break Ali's jaw last March, had been dropped by Norton because he was spending too much time with Frazier. Futch, who used to move into the Frazier camp shortly before Joe's big fights, has taken the place of the late Yank Durham, Frazier's man-ager. Another dispatch told of hurgiars getting about \$100 from Joe's Cloverlay Gym in North Philadelphia. "Norton tells me I'm not fired," Futch said cheerfully.

#### World Cup Giant Slalom

# Italian Girl Ski Winner, Barbara Cochran Is 2d

LES GETS, France, Jan. 9 (AP). others," he said. "She is a gir. -Today was the turn of the Ital. ian girly as Ciaudla Giordani, 18-year-old daughter of a sports reporter, swept to world prominence by beating the international elite of women skiling in a World Cup giant slalom herc.

Miss Giordani beat America's Olympic gold medalist Earbara Cochran by twelve-hundredths of a second to win the first major race of her career and join the top contenders for next month's world championships in St. Moritz, Switzerland.

It was the second time in two days that the American women's team-and a Cochran-had to contend with a second place. Barbara's younger sister, Lindy, was runner-up to West Germany's Christa Zechmeister in yesterday's special slalom.

Miss Giordani twisted down the unusually steep and tricky course of 1,270 meters and 51 gates in 1 minute 19.37 seconds to give the Italian women's team its first international victory of the scason. It was a fitting revenge for the Italian women's fiasco in vesterday's slalom, when all hut two of the Italian squad abandoned or were disqualified, and none finished better than 35th.

Last Tuesday, the Italian men overwhelmed the ski world by eapturing the top five places in a World Cup giant slatom.

Barbara Cochran was second in 1:19.49, followed by Liechtenstein's Hanny Wenzel, 1:19.53, West Ger-many's Traudi Treichl, fourth in 1:20.48 and Austria's Irmgard Lukasser, fifth in 1:20.67.

Annemarie Proell-Moser, the World Cup leader with 121 points, failed to gain on her rivals as she finished 10th. Miss Wenzel's third in the race put her into third place in cup standings with 62 points, four less than Canada's Kathy Kreiner.

Claudia greeted her victory with a shrug of her shoulders, but chief Italian trainer Bruno Angelini was elated. "Claudia has now become a dangerous threat to all the

#### **ABA Tams Sell** Neumann to Stars

NEW YORK, Jan. 9 (NYT).-The Memphis Tams of the American Basketball Acsociation have tried solving some of their many internal problems by trading Johnny Neumann and his fiveyear \$400,000 contract to the Utah Stars for three nonstarters —Glen Combs, a guard, and Ron-nie Robinson and Mike Jackson,

both forwards. Neumann, a guard averaging 17 points a game, apparently was not playing the patterned offense coach Butch van Breda Kolft wants. As Neumann packed for the trip to Ulah, he said of the Tams' owner, Charles O. Finley, That man is useless. If the Memphis franchise goes bad, I hope the fans won't blame the players. It will be Finley's fault." Neumann may find some confusion when he arrives in Salt Lake City because the Stars re-

portedly will be sold Vince

Boryla, the Stars' president, said

the club owner. Bill Daniels, wanted to sell the team because

he planned to run for governor

of Colorado. Daniels, a Colorado

businessman, purchased the ABA

franchise in Los Angeles and

moved it to Salt Lake City.

#### Art Buchwald

# New Image for Ripoff

A meeting of the executive com-mittee was called at a duck shoot club in South Carolina to discuss ways and means of com-

bating the bad publicity petro-leum companies were getting over the energy crisis. Harlan Mudbank, president of Ripori, presented

the problem.
"Gentlemen, I BM SOITY to Say that the oil companies have a suchwald very bad image Buchwald

because of the fuel shortage that unfortunately has gripped the country in the last six months. The purpose of this meeting is to find a way to tell our story to the American people. Are there any suggestions?

Wilton Willbank, the advertis-ing vice-president, said, "Why don't we launch a national advertising campaign to show that in spite of the crisis, Ripoff is keeping its prices down?"
"Excellent." said Mu cellent " said Mudbank, "hut

where do we get the money to pay for the campaign?"
Willbank replied, "By raising the price of our gasoline a penny

Mudbank smiled. "Good thinking. If there ar: no objections the proposal is accepted. Are there any other ideas?"

Marvin Snowbank, vice-president in charge of public effairs, said, "It seems to me the key to a good image is Congress. We must persuade our lawmakers that we are doing the best we can to provide the necessary fuel at reasonable cost to the con-

"How do we do this?" Snowbank opened his folder.

#### Lindbergh Trophy Recovered by Police

ST. LOUIS, Jan. 9 (UPI).-The police yesterday recovered a gold trophy cup awarded to Charles Lindbergh when he made his solo flight from New York to Paris in

The cup was stolen Friday along with two sterling-silver husts of Mr. Lindbergh and his wife, valoed at \$135,000 each, and a picture frame. The items were taken from a collection of Lindbergh memorabilia at the Missouri Historical Society in Forest Park.

WASHINGTON. - The Ripoff "By contributing to the political Oil Company was worried. campaigns of everyone running

for office in 1974." "But," said Mudbank, "that would cost us a fortune."

Snowbank read from a paper. "Our Washington lobbyists believe we can do it by adding only two cents to what we are now charging for a gallon of gas." "It doesn't seem to be out of

line," the comptroller said. "It cost us a cent a gallon just to elect Nixon. For two cents a gal-Ion we're getting an entire Con-

"Good," said Mudbank. "We seem to be making progress. What else can we do to win the hearts and minds of the American peo-

Rineholt Sandbank, the vicepresident for financial affairs, said. "One of the things that seems to be bugging the American people is our profit picture. I estimate we stand to make 16 percent profit after taxes this year. We must persuade the country that these profits are within the cost of living guidelines."

"How?" Mudbank asked. "By distributing American flag pins for every customer's lapel. I can't conceive of anyone questioning our profits if we give them a free American flag."

"Those lapel flags aren't cheap," the comptroller protested. "We'll pass on the cost of them to the customer. Three cents e

gallon is a small price to pay for the privilege of wearing Old Glory," said Sandbank. No objection was raised and

Mudbank continued.

"While we're at it, I'd like to bring up another problem. No one is certain how long this ener-gy crisis will last. There may come a day when new sources of energy will be found. It is even possible that someone will develop an automobile that doesn't use gasoline. In 20 years this could put us in a terrible profit squeeze. We can't wait until it happens. We must prepare for it now. What do we do?"

The vice-president for financial affairs said. "It's obvious. We charge an extra nickel a gallon which we'll invest in tax-free bonds. No one can object to our insuring ourselves against future unfair competition."

Mudbank seemed very pleased. This has been a most successful meeting. Now let's all go out and shoot some ducks."

Diego Giacometti, who was his brother's collaborator, model, technician, confident and slave.

# Sorcerer's **Apprentice**

By Robert Wernick

PARIS (IHT).—Every so often there appears on the market a statue ascribed to Alberto Giacometti of which the authenticity is challenged. The simplest way to resolve the issue is to ship the work off to Paris, to the familiar eddress on the Rue Hippolyte-Maindron where the master lived and worked for most of his life in a pair of clottered gray rooms coated with plaster dust. Not, indeed, to the same studio, but to the one right next to it, equally clottered with tools and rods and blocks of plaster, where Alberto's brother Diego works at the same kind of table with the same materials in the same atmosphere of gritty-gray dust.
Diego has only to open the crate and
lift up the work an inch or so. For every

work of Alberto'e passed through Diego's hands he had seen and felt and learned by heart every bump and wrinkle and discoloration of plaster or bronze, during a stretch of some 40 years. During that time he was collaborator, model, technician, confidant, slave. He mixed the plaster, he made the casts, carried the finished plaster to the foundry and polished and patined the bronze when it came back. Diego's face—inquiring, lively, neither blunt nor sharp, with a look neither open oor closed—was one of Alberto's obsessions. Over the years, there must have been ousands of days he sat on the same chair io the same pose in the studio, staring out into the narrow alley flanked with casts of Greek pediments, while Alberto hunted the proportions of his nose, his ears, his stubborn chin.

#### A Lost Soul

When Alberto died in 1966, Diego for months wandered Paris like a lost soul. What is there for me to do now!" he would say over long brandies at the bars where Alberto had burned away the nights of his last years; "I might as well go off and herd goats in Patagonia."

He did no such thing, of course. Like a faithful brother and a good Swiss, he went back to his trade. He had already begun to make a name for himself with little ornamental figures and pieces of bronze furniture for his friends. Now the furniture began to become fashionable and over the years it has acquired its inde-pendent, and considerable, value on the

art market. Blinking a little in the light of notoriety, he is being recognised as no longer merely a brother, a shadow, but as himself, an independent artist with a dis-

tinctive and inimitable style.

He thinks, or says he thinks, that this is all nonsense. He signs his works Diego only, as if to say that the family name should be reserved for works of art and he is only a craftsman: a conscientious

#### Came to Paris in '20s

Both brothers were stamped profoundly by their childhood in the remote Swiss valley where they were born at the turn of the century; a gray, door Protestant country, bot a healthy enough place to grow up in. While his brother read and sketched and brooded in caves, he spent active animal days climbing, hiking, ski-ing, learning the ways of the marmots and the otters, caddying at a golf course, smuggling currency across the Italian border. He held odd jobs in nearby towns and went off to seek his fortune like other valley boys.

By the late 1920s he was in Paris, where Alberto needed someone to help him, and Diego was glad to learn a new trade. He learned the ins and outs of carving, molding, welding, casting. He lived the life of the times, met all the famous surrealists, drifted through Montparnasse with American heiresses and drank at the Dôme with young men like Georges Simenon who said they were going to be famous. He has barely budged from Paris, and more especially the 14th Arrondissement, since, Diego's furniture swarms with animalscats, dogs, foxes, lions, toads, eagles, owls,

certain stamp: a grave, reserved selfstrificiency, a polite alooftess.

The animals are numberless now, as the

orders pour in from fashionable address and the casts pile up in the courtyard of his new house, a pleasant, shaded little retreat just around the corner from his studio. He lives alone there now, an el-derly gentleman with a monklike tringe of white hair. The deep-eyed bronze lion on the door, which might be a self-portrait, announces the man within: shy, warm, melancholy, polite, vigorous.

There are invitations from counter and Greek shipbuilders for lunches or cocktails, and he has tailored English suits for these occasions. But he prefers to take the swells in small doses: "Givenchy," he grumbles, "wants me to go on a cruise on the Aegean in his yatch; what in God's name can you do on a yacht?"

Better to stay home, which he now calls "the factory," and keep working.

As he grows older, the work flowers into new shapes, his imagination grows more restless, more poetical. The furniture is still sound and comfortable, the craftsman-ship always impeccable, but a note of the odd, the dreamlike, comes in, the way it did in Alberto's early surrealist sculptures, though without their cruelty and bite. The animals, without losing their naturalistic charm, verge into mythology, they become strens or centaurs or totems. A chandeller made for Mrs. Paul Mellon in Florida becomes a floating garden of surging white flowers. Table legs swell into prehistoric goddesses.

It remains good, sturdy, practical furniture, bot it carries into all those dining rooms and salons a gay phantasmagoria, a white-magic garland of multitudinous
